

THE BLAIRMORE ENTERPRISE

VOL. XIII, NO. 35.

BLAIRMORE, ALBERTA, THURSDAY, AUGUST 31, 1922.

\$240 YEARLY

GO TO BELLEVUE

ON MONDAY NEXT

Don't forget the Bellevue and District Horticultural and Industrial Club's annual exhibition to be held at Bellevue on Monday next. Owing to the weather this season being ideal, prospects are that this season's exhibition will surpass all previous at-

tempts.

A splendid programme of field sports has been arranged, which will include a grand football match between the famous Lethbridge "Calles" and the local team.

A grand dance will be held in the new I. O. O. F. hall at night.

A full list of prize winners will be given in our next issue.

FRED ALLOTT KILLED IN MINE

An accident occurred in one of the cross entries of Greenhill mine about 1:30 yesterday, in which Fred Allott was buried beneath a fall of coal and died shortly afterwards from injuries received.

Fred had just entered upon his third shift since the five-months strike. Fred Allott was one of the best known and most experienced miners in the Crows' Nest Pass. He came to this section from England about nineteen years ago, and for a number of years worked in the mines at Frank before coming to Blairmore. He was an authority in mine rescue and first aid instruction and on a great many occasions during the past nineteen years had volunteered to rescue entombed miners. He was a member of the Blairmore Mine Rescue Team, which for the past few weeks has been training for the competitions to be held at Fernie on Monday next. In sport of all descriptions, Freddie was a real live enthusiast and supporter.

He was forty-five years of age and unmarried and has several sisters and brothers, most of whom reside in the Old Country. Of late years he has been sending a portion of his earnings to England for the purpose of educating a niece of his for the teaching profession and his will properly made out and in the hands of trustees provides that practically all his belongings are bequeathed to his niece. He was a devout member of the I. O. O. F. and Masonic Orders.

An inquest will be held on tomorrow, Friday afternoon, following interment, which takes place at the general cemetery. The arrangements are in the hands of the local Masons.

Out of respect for the late Fred Allott, the lawn social billed for last evening by the ladies of St. Anne's Catholic church, and the luncheon arranged by the board of trade were postponed indefinitely.

SOME DAM REPAIRS ARE CONTRACTED FOR

The regular fortnightly meeting of the town council took place on Monday night, with Deputy Mayor Morgan and Councillors J. A. McDonald, Alex. Morency, W. McVey and J. Angus MacDonald in attendance.

The minutes of previous regular meeting were approved as read and several small accounts were passed for payment, subject to approval by committees.

Account from J. J. Murray for storage of Cross furniture was read. Council felt that town was not liable in this instance and ordered the account referred back.

Complaint was made of Doukhobos making house to house sales of farm products. Looking up the Town's Act, it was decided that no tax or license could be levied.

The chief of police was instructed to take steps for the proper enforcement of the pound by-law. Cattle and horses have been reported as roaming the streets frequently. In this connection, the council became aware of certain parties building shacks within the limits of the town, without permits and contrary to the rules of the Provincial Board of Health. Prosecutions will likely follow.

Councillor McVey gave notice that at the next regular meeting of the council he would introduce a by-law to amend By-Law No. 9, respecting dogs, etc.

The tender of E. J. Pozi for the contract to effect repairs to the water reservoir was accepted. The contract calls for a casing of nine inches of 1 to 5 cement and gravel on the inside of present wall and six inches on the outside of the wall. Work to be subject to inspection and to start immediately.

On recommendation of the town's solicitor, Mr. L. H. Putnam, no action was taken in connection with the petition of residents of Madawaska Street for the diversion of creek water flowing through that section.

Council adjourned at 10:30.

DISTRICT GOLF TOURNAMENT

The East Kootenay-Crows' Nest Pass District Golf Tournament will open at Cranbrook on Saturday, Sept. 2, and already the secretary has received entries from Medicine Hat, Lethbridge, Macleod, Blairmore, Fernie, Waldo and Cranbrook clubs. This will be the first truly representative gathering of the lovers of the royal and ancient game throughout this section and the interest that is being taken indicates its ultimate success and likewise a permanent fixture.

The method to be followed for handling the play will be that the players will be paired and a qualifying round of 18 holes played. These cards when turned in to the committee will be the guides for dividing the players into respective flights. The first eight lowest scores will be placed in the championship flight; the next ten in the second flight and so on for six flights. The flights will play knock-out match competitions. There will also be a consolation competition in which only those defeated in the first game of each flight will be qualified to play. The tournament will continue for three days, in addition to which the Cranbrook club have arranged a program of other social events which will ensure a most enjoyable outing.

In New York they have been stopping funerals in order to examine the hearse for booze. Even departed spirits are not allowed any peace by modern day sleuths.

A hydrocoptane that can ride out the roughest sea and will bridle to anchor like a whaleback, is now being experimented on in Great Britain, according to Captain A. G. Haskell, of the Royal Air Force a recent visitor to Edmonton.

ST. CYRIL'S SUNDAY SCHOOL PICNIC

St. Cyril's Sunday School picnic was a gala event for the children and grown up of St. Cyril's parish, Bellevue. On Monday afternoon, August 28th, at 3 o'clock, the children and their parents assembled at the picnic grounds on the Little townsite, near the Old Man River, an ideal spot for the occasion. The weather was ideal and the various games and sports were carried out with great success.

Ice cream, candies, peanuts and fruits were distributed liberally. The scrambles for candy and peanuts were greatly appreciated by all.

Father Cosman, the pastor, is certainly pleased with the picnic, which entailed a lot of work and considerable anxiety with him in the safety of the little tots, yet he feels amply repaid, as all seemed to enjoy themselves and will remember the 1922 Sunday School picnic. Each and every one enjoyed themselves to their hearts' content. The older people took as much interest as the youngsters.

Luncheon was served, after which all returned home, thoroughly tired out, but more than satisfied with the outing.

Following are only a few of the prize winners: First prizes—Mary McIntyre, Mrs. Cormier, Mrs. Lippincott, J. Cormier, J. Muth, G. Bushy, E. Cormier, F. Duja. Second prizes—

MINERS BETTER TO WORK

Terms of factory to the miners and operations were reached last week and a vote of the miners of the district on Saturday decided almost unanimously on returning to work on Monday. A small percentage in most of the camps voted against work.

Work resumed all through the district on Monday and already the coal is moving.

Some little trouble has arisen at Hillcrest, however, where the men have since walked out because, it is stated, that the company undertook to employ men who worked in non-union mines while the strike was in progress.

Large numbers of men who during the strike period have either been holidaying or working in other parts, are daily returning to seek their old positions at the mines and most of them are being placed.

The resumption of operations in the mining camps has caused a divided impetus in business circles and all look forward to a busy period for at least a few months.

Head Line—"Do clothes make the man?" More often break him.

You May Have Kidney Trouble and Not Know It

If your back aches and you suffer from dragging pains, it is an evidence your kidneys may not be acting just right. What you need is a course with Dr. Hamilton's Pills. These contain both Mandrake and Bismuth and act very beneficially upon the liver and kidneys. "I was bothered a great deal with my kidneys, but got quick relief from Dr. Hamilton's Pills. My trouble manifested itself by pain in the back and by constant headache. I quickly recovered after using a few boxes of Dr. Hamilton's Pills. They brought me health, strength and vigor." MY CANADA

—BY—
RILNOR MARSDEN KLIOT

Published by Special Arrangement with the Author

(Continued)

Bar B Ranch, Carbon City,
July 31st, 1921.

What a wretched lot of the blues I must have had on Wednesday! Fortunately for the retention of my self respect, I have ever since been too busy to be dismal, the days have not been half long enough to hold all the new impressions.

I woke bright and early Thursday morning, feeling fit as a fiddle, after all, there might be worse places than Carbon City. And when I had eaten my breakfast and written to Mother and Mr. Arnold and made a trial of my skill on the "Blue-bell" piano, I felt that there might be very much worse places. By the way, Mrs. Bingham tells me that the sheep-droving pianist is a well-educated but rather dissipated young Englishman, a "renegade" man, "Paged by name." He is our nearest neighbour, and comes often to Mr. Bingham for advice regarding the management of his ranch. The advice, Mrs. Bingham adds, is never followed, and he is in a fair way to lose the money he has foolishly invested in an unnecessarily expensive outfit.

If what follows is not proof positive of my innate stupidity and my complete disregard of the laws of coincidence, then I am no judge of such matters.

Mrs. Bingham, Sunny and I sat in the parlour after breakfast, waiting for Mr. Bingham to come and tell us when he would be ready to leave for the ranch. I was reading when I heard Mr. Bingham's voice from the hall, and I did not look up until Sunny shouted, "Father, that Uncle Don talking!" Then I looked up, just in time to see her rush through the door, dropping her beloved doll as she ran. She returned, perched proudly on the shoulder of Sunny as Don Livingston!

The thought of the shilling I nearly gave him filled my mind so completely that I scarcely heard Mrs. Bingham as she introduced him. Of course he is not Mrs. Bingham's brother, as I had supposed from Sunny's constant chatter about "Uncle Don," but Mr. Bingham's partner, and merely adopted by Sunny as I am.

Due, no doubt, to the fact that he had the upper hand, Mr. Livingston did not seem to be the least bit concerned, and there was a noticeable twinkle in his eye as he asked me if this were my first visit to the West.

Headache

Recurring headaches usually come from an exhaustion of the nervous system, and they will disappear until the view of the nerve cells is restored by such up-building treatment as Dr. Chase's Nerve Food.

Temporary relief by use of powders is often obtained at an enormous expense to the nervous system and the general health.

Get the nerve right and the headaches will not return.

Mrs. W. J. Pearce, Nunn St.,
Cobourg, Ont., writes:

"My system became run-down and I suffered greatly with pain in my head. This was so severe that I would have to find a cloth tightly about my head so that I could get any work done. A friend advised the use of Dr. Chase's Nerve Food, and after taking the first box I found quite an improvement in my condition. I continued using it, and I had taken about seven boxes, when my headaches completely disappeared, my system gradually, completely restoring the pain in my head."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

THE SALMON

PEARL, who had changed Pizmie, the End-of-the-Earth Brownie, into a creature, was ever so pleased at the interest he showed in all that they came across in their under-the-ocean swim.

"You seem to wish to have everything explained to you!" she laughed, teasingly.

"I always want things explained," he answered seriously, "because there is nothing in the world I enjoy so much as learning about new things."

"My goodness!" exclaimed Pizmie, "what is that? It looks like some swimming jewel!"

"Nothing more or less than a Salmon," laughed Pearl. "A Salmon that I have to love to eat."

"Will you tell me more about it?"

"Certainly," she answered. "Aside from the fact that its flesh is pink and very delicious (which is almost the only thing concerning a Salmon that interests humans), there is a lot concerning Salmons that is more than amazing. For instance, at three different points of the Salmon's life, it is absolutely different, both in appearance and habits from what it was or will be in its other stages."

"When Salmon first emerges from the eggs they are very helpless things and for the first weeks of life they are careful always to hide, they also carry about with them sort of the egg from which hatched, as it serves as food. The end of about fifty days they begin to have a fish shape; but not before. During this first stage the young Salmon is called a 'Parr.' During their parrishood they remain in fresh river waters and only venture to sea when they have become 'Smolts.' (A smolt is a young Salmon during its second stage of development). For two months the Smolt stays in the ocean, during which time it grows most amazingly. These two months over, it returns to its native river and is now called a 'Grilse.'"

"Why does it go back to the river?" asked Pizmie, who was hugely interested.

"To lay eggs," Pearl answered. "There is nothing strange in that; but," she added, "it does seem so much strange, that the Grilse who has the entire ocean as its home never loses itself too much to remember how to find its native river. It is as though a weirdly powerful memory or instinct dragged it back to the spot of its birth."

"Just what is 'Instinct'?"

"Pearl!" and Pizmie's eyes were wide with thought.

"Can you tell me?"

"As far as I know,"

"I'll tell you, but though we'll all each and every one of us FEEL what it is, it is extremely difficult to explain."

The Mermaid swam alongside of Pizmie for several minutes in silence before she answered. She was thinking. "I suppose," she began, "the only way to speak of instinct is to call it a God-given knowledge that bestows on all living creatures for their own protection."

"How different from the little soul of how the stars them to live their lives. We have to call this undeniable fact something else, for there is no doubt at all that there is no doubt at all that it is instinct alone that guides a Salmon from the whole immense tract of ocean water back to its very own river."

PARR. (BABY SALMON)

"There is nothing strange in that; but," she added, "it does seem so much strange, that the Grilse who has the entire ocean as its home never loses itself too much to remember how to find its native river. It is as though a weirdly powerful memory or instinct dragged it back to the spot of its birth."

"Just what is 'Instinct'?"

"Pearl!" and Pizmie's eyes were wide with thought.

SALMON

"They even leap up and over water falls rather than be kept from the familiar spot where they are searching for, and can curve their tails back to their heads in such a way that they are able to jump high distances."

"How different from the little soul of how the stars them to live their lives. We have to call this undeniable fact something else, for there is no doubt at all that there is no doubt at all that it is instinct alone that guides a Salmon from the whole immense tract of ocean water back to its very own river."

Copyright, 1922.

Humiliating as is the thought, I am forced to believe that his apparent embarrassment at that former occasion was not embarrassment at all, but well-concealed amusement.

Have a presentiment that he is going to need discipline, I do not approve of his politeness accompanied by a twinkle. I was very cool and very dignified, slightly bored in fact, if only were I judge by my temperament. And I suppose Mary knew all the time who "Uncle Don" was. Revenge will be sweet.

At half-past nine we left the town. The horses that came prancing up to the hotel door must have been close related to those that tried to climb the elevator at Elba, but Sunny was delighted to see the horses, and concluded that they could not be quite so murderous as they looked.

"Mother, can I please sit in the front seat with Uncle Don?" coaxed Sunny. "And you come, too, Auntie Elton, so I can tell you just as soon as we see the house. I wonder if David will come to meet me. Do you think he will, Uncle Don?"

"Sure he will," replied that self-possessed young man in answer to the last question. "He promised me faithfully last night that he would wait for us at the first stage. Then he added, 'Perhaps Auntie Elton would rather sit with her back to the horses—English people are like that, you know.'"

The cheek of him!

"Thank you," I said, teasingly. "Auntie Elton, did I emphasize size it?" "Would much rather stay with Mrs. Bingham."

Going in a southerly direction from the town, we followed the well-worn trail mile after mile, over plain and through valley. Once we reached a mother-will and her litter of woolly cubs; another time a cynical-looking eagle fluted up ahead of us; and once we saw in the distance a large flock of sheep watched over by a lone shepherd.

In one valley I noticed that the "cut-banks" were streaked with black, and black streaks were outcropping teams of coal, and pointed to a place farther along the canyon where a mine-shaft could be dimly seen. A "cut-bank" is, presumably, a place where some prehistoric glacial or other force has torn away the face of a hill and left a cleanly cut bank as steep and smooth as the side of a house—an excellent place in which to study geological strata.

When I finally saw a house, ten miles out of Carbon City, I knew I was sure Columbus must have felt

when he sighted land. This house, by the way, is the only one between Carbon City and the Bar B.

"Is that a ranch?" I asked.

"No," replied Mrs. Bingham with a strange emphasis. "That is a farm. We'll call there, for I have some books and magazines for Mrs. Carroll."

"A farm?" I repeated. "I did not know that there were farms in this part of the country."

"There should not be," Mrs. Bingham answered. And then she told me the history of the Carrolls.

They are English, of good family and used to all the refinements if not the luxuries of life. But two years ago—"land shark," to use Mrs. Bingham's phrase, combined business and pleasure in a visit to the Old Country, and while there persuaded Mr. Carroll to sink all his capital in this so-called ranch. He was wrong, as the cheapness of the land and the healthfulness of the warm Alberta winters, made me feel positively wretched to see the place. Mrs. Carroll came to the door as we drove up, and invited us to go in just as if her sisterable shack had been a mansion. But she seemed to be relieved when Mrs. Bingham introduced me, and, that I was from England and that I was to spend the winter at the ranch "From England," Mrs. Carroll repeated slowly, and I hope I shall never again see an expression of sadness, such as crossed her face as she spoke. Mr. Carroll did not appear. I have formed an opinion, not so much from what Mrs. Bingham said as from what she left unsaid, that he has allowed himself to brood over his bad fortune, and that he could only be persuaded to exert himself matters might be great-

ly improved. They have one child, a little boy about as sunny as a day.

In ten minutes we "hit the trail" again, and again drove mile after mile over plain and through valley. I was beginning to feel as if my back were six inches too long, and to speculate upon how many layers of skin would peel off my nose, when suddenly Sunny called out, "Shut your eyes, Auntie Elton, and don't open them until I tell you to."

I closed my eyes obediently, glad enough to rest them from the blazing sun. Promptly came the second order.

"Now, Auntie Elton, look!"

I looked.

And far away to the south-west the jagged line of the Rockies broke into the blue of the sky. So far away that their natural colours were not discernible, they seemed to be made of shimmering steel and mother-of-pearl, so beautiful in their unexpectedness that I could not speak.

"That big one over there by himself is Old Chief, he belongs to the Yankees, but I just love him," volunteered Sunny.

I closed my eyes ached, then I rested them and looked again. Still I ever the look of looking, I wonder? Need I say that the remainder of our drive was not monotonous?

David was waiting for us at the first stage. He was a small dog so greatly excited. He wriggled with joy all the way from the tip of his nose to his rudimentary tail, ran around and around the wagon barking like mad, and was only silenced when Mr. Livingston got out and lifted him to the seat beside Sunny. He is a jolly-looking little dog, with a raxish black spot around his eye, a black berline, and a trick of running on three legs—"to excite sympathy," Mr. Livingston explains.

It was one o'clock when we reached the house. Lee, the Chinese cook, welcomed us warmly for an Oriental, I mean—and conducted us to the dining-room, where as the Suffolk black spot around his eye, a black berline, and a trick of running on three legs—"to excite sympathy," Mr. Livingston explains.

Some More Truths.

WOULD you use a steam shovel to move a pebble? Certainly not. Implements are built according to the work they have to do.

Would you use a grown-up's remedy for your baby's ills? Certainly not. Remedies are prepared according to the work THEY have to do.

All this is preliminary to reminding you that Fletcher's Castoria was sought out, found and is prepared solely as a remedy for Infants and Children. And let this be a warning against Substitutes, Counterfeits and the Just-as-good stuff that may be all right for you in all your strength, but dangerous for the little babe.

All the mother-love that lies within your heart cries out to you: Be true to Baby. And being true to Baby you will keep in the house remedies specially prepared for babies as you would a baby's food, hairbrush, toothbrush or sponge.

Children Cry For Fletcher's

Your Friend, the Physician.

The history of all medicines carries with it the story of battles against popular beliefs: fights against prejudice; even differences of opinion among scientists and men devoting their lives to research work; laboring away for the betterment of humanity. This information is at the hand of all physicians. He is with you at a moment's call, be the trouble trifling or great. He is your friend, your household counselor. He is the one to whom you can always look for advice even though it might not be a case of sickness. He is not just a doctor. He is a student to his last and final call. His patients are his family and to lose one is little less than losing one of his own flesh and blood.

Believe him when he tells you—as he will—that Fletcher's Castoria has never harmed the slightest babe, and that it is a good thing to keep in the house. He knows.

Canadian Cattle Prices in Britain

Cattle from Canada Command High Prices in British Market

While Irish bacon still retains its position in the British market, Irish cattle are not seen to be doing so well. The 188,921 sheep, and 482,776 ewes of the country. The Dominion Livestock Branch reported Irish bacon selling at from 159 shillings to 167 shillings the long hundredweight, Danish at from 126 to 140 shillings and United States at from 115 to 120 shillings. On the other hand Canadian cattle commanded as high as 14c a pound live weight, and Irish at from 10½ to 12½c. Prime Scotch ranged at from 16½ to 17½c.

Regarding wool the Livestock Branch reports said the spring rise was being maintained and that a keen interest was being shown in western products.

Stop the Cough—Coughing is caused by irritation in the respiratory passages and in the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and by consequence the cough will usually stop. Try it and you will be satisfied.

Farming Second Industry in B.C.

Production of the Forest Leads With a Good Margin

Agriculture, with a production of \$59,742,294, was the second industry in British Columbia, in 1921, according to a report issued by Hon. E. Barrow, Minister of Agriculture. Production shows a shrinkage of 33.39 per cent, in value from the preceding year, owing to decreased values.

Forest products lead the province, with a value of \$64,970,000, while mineral production had a value of \$28,066,641 for the same period. The report for 1921 was the largest on record. The value of the province's production was \$65,044,850, an increase of 15 per cent over the value of the 1920 crop. In dairy products there was an increase of \$46,558 pounds of butter, while egg production increased by 200,677 dozen.

The area planted to fodder crops was 6,556 acres more than in 1920, but the total value of fodder crops was \$4,880,432, owing to the low value of the hay crop. The honey production was 369,974 pounds, valued at \$49,631, against \$67,701 for the previous year.

TORONTO

WORLD HAPPENINGS BRIEFLY TOLD

Fire of unknown origin totally destroyed the roundhouse and machine shops of the Eastern British Columbia Railway at Corbin, with an estimated loss of \$70,000.

Arthur O'Brien, President of the Gaelic League at London, who was arrested Aug. 2 by the Free State authorities, has been released from the Maryborough Barracks.

Ten persons were killed and fifty wounded during Polish aerial maneuvers at Putzig, when an aviator accidentally dropped a bomb among 800 spectators.

Mr. Sir Douglas, 11,174 feet, has been conquered for the second time by eleven members of the Alpine Club of Canada, who were in charge of Rudolph Aemmer, the well-known Swiss guide.

The Riga correspondent of the Times says it is reliably reported that serious Russo-French negotiations are developing in Berlin, Paris and Moscow, and that the appointment of M. Tchitcherine as Soviet envoy in Paris is almost certain.

J. B. Craig and J. A. Richardson have been elected President and Vice-President respectively of the Winnipeg Grain Exchange. Dr. Robert Magill was re-elected secretary-treasurer.

It is estimated that, in the process of consolidating the Militia Department, the Air Force and the Naval Service Department, Ottawa, upwards of 1,000 employees have been deprived of their positions.

Owing to the shortage of coal the Ford Motor Company's Highland Park plant at Detroit, has been equipped with oil burners. The change was made without loss of time to any of the 42,000 employees.

Nearly one-third of the 236,000 way windows in Great Britain have been repaired. The rate of re-employment at one time was as high as 2,000 monthly but recently the rate has decreased to between less than 1,000 a month.

Reports to the health section of the League of Nations show that in the Kharkov district of Russia early this year people were dying at the rate of 10,000 a month, or a mortality of 800 to every 1,000. Between March and 20, 125,000 persons died of hunger.

An All-Metal Aeroplane

Airships Made of Aluminum May Supplant Earlier Types

There was recently completed in Great Britain the first aeroplane to be made wholly of metal. The advantages of doing away with wood and other combustible material need not be emphasized, and the all-metal aeroplane gives promise of supplanting all the earlier forms. A special alloy of aluminum is used in its construction, and the Government is at present engaged in making very elaborate tests of the strength of every part. Special attention is being given to the risks of corrosion with the metal employed and investigation on this point are being carried out in the Department of Scientific and Industrial Research. So much depends on this new type of aeroplane that although the first flying tests have been very satisfactory the Government prefers to regard the model as an experiment and to suspend judgment until a most exhaustive examination over a long period is completed.

Corns Between the Toes Painfully Removed

A real, sure, dependable remedy that has been lifting out corns for the past fifty years will surely lift yours out. Putnam's Corn Extractor is the old, reliable corn remedy—it stands the test of time and never fails, 25c everywhere.

Testing Tractors

Device that Gives Details of Test Performance

It is by no means an easy matter for an agriculturist to choose the best type of tractor for his particular purpose. All the more important, therefore, is it that accurate details should be available of test performances of each model. Comparative trials involve the use of an instrument for recording the exact pull which the tractor exerts under different conditions. The first types of instruments employed for this purpose were of rather a laboratory character, and a British engineer was therefore led to design an appliance which, while accurate, could readily withstand the rough conditions of tests in ploughing and other operations. The instrument he has designed has proved extremely successful and has been adopted by British and other governments for testing haulage appliances of various kinds. It can be arranged to give a record on a chart of the time occupied by any particular test, in addition to the draw-bar pull at any moment, and it will record the depth of the furrow which is being ploughed.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Shipping Wheat Via Vancouver

According to a prominent Vancouver grain dealer the movement of wheat through Vancouver will be at least equal last year's total. He has just returned from a business trip through Alberta and Manitoba. Chinese and Japanese inquiries have become active during the last few days and the first shipments will be in late October or early November.

Soothes Irritable Throat, Relieves Bronchitis Quickly

No Drugs to Take, No Medicine to Upset the Stomach, Just Breathe "Catarrhose"

Count ten—a bad cold is relieved by Catarrhose—wait one minute and you will feel its soothing influence on a sore irritated throat. No failure with "Catarrhose"—it is effective because you can breathe a healing vapor to the very spot that needs help. The big thing to remember about Catarrhose is this, you just breathe a healing play vapor that is full of the purest balsams, that is rich in the greatest healing agents known to science. This wonderful vapor dispels all soreness, kills all germs, gives nature a chance to completely destroy the disease. Colds and throat troubles can't last if the pure healing vapor of Catarrhose is breathed. Catarrh will disappear, bronchitis attacks will cease, coughs and winterills will become a thing of the past. Complete relief lasts two months. Price \$1.00, smaller size 50c, sample size 25c. All dealers or the Catarrhose Co., Montreal.

Encouraging Pig Clubs

Pure-Bred Registered Berkshire Pigs Distributed Amongst School Children

Seventy-two pure-bred registered Berkshire sow pigs were distributed at Brookina and Bannock to thirty-six boys and girls, members of the pig clubs at these points. The pigs cost \$20 each delivered, and the purchasers were financed by the local banks, which loaned approved members \$40 on their notes. These pigs will all be taken care of and fed by the members themselves, who will exhibit them at the school fairs.

CATARHIAL DEAFNESS

Is greatly relieved by constitutional treatment. HALL'S CATARHIAL MEDICINE is a constitutional remedy for Catarrhial Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or a humming sound, and when it is entirely closed, deafness is the result. Unless inflammation can be reduced, your hearing will be lost. HALL'S CATARHIAL MEDICINE acts through the blood to reduce the inflammation and restore hearing in restoring normal conditions.

Prescribes free. All Druggists. F. J. Cheney & Co., Toledo, Ohio.

Afro-American Banks

Sixty-Nine in States With Resources of \$100,000,000

There are sixty-nine negro banks in the United States, with combined resources estimated at \$100,000,000. Sixty-one are in the south. There are twenty-five negro insurance companies in the United States, with assets aggregated \$45,339,184. Twenty-one are in the south. Negro banks have enjoyed a longer existence than negro insurance companies. The first bank of its kind was opened in the early eighties. Twenty-five years ago insurance companies owned and operated by Afro-Americans were practically unknown. Virginia is known as the home of the first negro bank.

In an English town, not long ago, a woman won a competition by lighting 103 candles with one ordinary wooden safety match.

Keep Minard's Liniment in the house

Different Set

"Have you called on the new neighbors yet?"

"No; they're hardly our kind, you see. They are the sort of people who never do anything they can't afford."—Boston Transcript.

30,000 Claims Presented

G.W.V.A. Meets With Success in Securing Adjustments

The total number of claims presented for adjustment under the Clean Sweep Campaign conducted by the Dominion Command G.W.V.A. up to August 1st, was in excess of 30,000. The campaign now in its tenth month has been the means of securing for ex-servicemen, women and dependents, adjustments of war service gratuity, pay and allowances, pensions and other monetary claims in excess of two million dollars. Claims for hospitalization, medical attention, discharge certificates, medals, scrolls and pensions, civil service bonus, travelling expenses and dozens of other matters arising from war service have also been adjusted. It has been impossible to estimate the exact percentage of adjustments secured; an average thousand of the cases are still pending. In previous months the average has been between 30 and 40 per cent.

"There are few people who realize the large number of individual problems that have arisen from war service since the signing of the Armistice," Dominion President R. B. Maxwell of the G.W.V.A. stated this week. "Including the 30,000 claims resulting from the Clean Sweep Campaign, the Dominion Command of this association has handled in excess of 100,000 individual cases since its formation more than five years ago. A rather remarkable feature of this unique work is that the G.W.V.A. has given service, regardless of whether the claimant was a member of the organization or not. As a result nearly 50 per cent of the adjustment work has been for non-members, including, of course, dependents, as far as can be estimated." The cost of the work has been borne entirely by the association.

King Offers Prize For Flying Race

Royal Aero Club Arranging Return Flight from Croydon to Glasgow

There is to be a great air race for a cup presented by the King some time during the first fortnight in September.

The race will occupy two days, one for the outward half of the course and one for the return. It will start and finish at Croydon, and Glasgow will be its northernmost limit. Birmingham, Newcastle-on-Tyne, Manchester and other cities are among the cities that will be points on the route and it is hoped that the civic authorities will do all that is possible to facilitate the arrangements for the race, which will be in the hands of the Royal Aero Club.

The plans for the race so far are not advanced, but it is already settled that it shall be flown under a handicap, and that, in addition to the King's Cup, a trophy which many aircraft men are anxious to win, there shall be certain subsidiary prizes. In the provision of these the promoters of the race have some expectation that the great industrial and commercial centres over which the racing aircraft will pass in the contest will take some part. The need for the encouragement of aviation is acute, and the race will provide an opportunity for the public who are concerned with the future of the country's dependence at a time of national emergency on our airways, to express their appreciation of them.

It is intended that only British aircraft and machines shall compete, any type of airplane will be eligible.

Moon's Geography Well Known

Half of Surface Has Been Mapped by Astronomers

So carefully has the visible moon been mapped and photographed that Sir Robert Ball has said, "Astronomers know the surface of the moon better than geographers know the interior of Africa." Every spot on the face of the moon which is as large as an English parish has been mapped, and all the more important objects have been named. This applies to only one-half of the moon's surface. The other half we know nothing. The moon's surface is richly covered with markings, the largest of which are great dark spaces which may be seen with the naked eye. The shadows thrown by the mountains of the moon are very dense and sharp because the moon has no air. By means of the shadows thrown the height of the peaks on the moon have been measured. Some of the craters are more than 60 miles wide; some have walls 10,000 feet high.

A Valuable Gift

Twelve mountain sheep were recently presented to the United States Bureau of Biological Survey by the Canadian National Parks Branch, to be liberated on the Montaña National Bison Range. The sheep were secured from the Rocky Mountain Park, and arrived at their destination in excellent condition. Their future will be watched with a great deal of interest by big game enthusiasts.

Perpetual Motion Clock

This Clock Runs 10 Years Before It is Wound

A demonstration of a clock which goes for 10 years without winding was given at the office of the British Horological Institute, in Kingsway. The clock, which is called the "Belle," is wound by electricity, and requires no special installation. The controlling principle is electro-magnetism. The current is drawn from a battery inclosed in a brass cylinder. The battery drives the pendulum, and the pendulum in turn acts as a motor and dynamo, and generates the required current. Just sufficient current is used to keep the battery alive.

Even at the end of 10 years winding is unnecessary. If the battery is renewed after that time the clock will go on until the end of the world, or, at least, until the mechanism "busts."

Have You Stomach Risings, Gas, Heart Burn, Sourness? Tells of a Simply Remedy

It's really wonderful the quick relief you get from ten or twenty drops of Nerviline taken in sweetened water. For cramps and spasms, Nerviline is equally efficient. To safeguard yourself against these ailments, keep handy on the shelf a bottle of the truly efficient Nerviline. It will relieve the minor aches and pains of the whole family. Good for internal or external use. 25c at all dealers.

Exhibits From Brooks

Superiority of District Shown by Requests for Exhibition Samples

For many years the superiority of the Brooks district has been acknowledged by requests to furnish exhibition samples of bundles of alfalfa, clover, vetches, peas, timothy, brome grass, western rye, grains and grass seeds, and contracts have again been let to many local farmers, both by the Dominion and Provincial Governments, for several carloads of exhibition bundles of agricultural products. These are to be distributed throughout the United States and Europe.

BABY'S GREAT DANGER DURING HOT WEATHER

More little ones die during the hot weather than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach troubles are the most common causes of death. A medicine is not at hand to give promptly the short delay too frequent means that the child has passed beyond aid. Baby's Own Tablets should always be kept in the house of every mother of young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or, if such troubles come suddenly, the prompt use of the Tablets will relieve the baby. The Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Discoveries Made at South Pole

Crew of Quat Found Gigantic Forests Under the Sea

There is a wonderful diamond mine in the Antarctic regions. This statement was made by members of the Quat-Bowdell Expedition. On a small island near South Georgia, on the fringe of the great icefields which guard the South Pole, was discovered which the Quat-Bowdell expedition declared to be the type that carries diamonds.

The expedition also discovered yellow quartz, and it is expected that an attempt will be made by a South African company to locate the diamond mine.

This is only one of the many discoveries made by members of the expedition. Gigantic forests were discovered under the sea, and vast new fishing grounds were located. The Antarctic waters are swarming with edible fish, and present a new outlet for the fishing industry. In fact, the fish are so plentiful that the expedition never needed to use bait of any description.

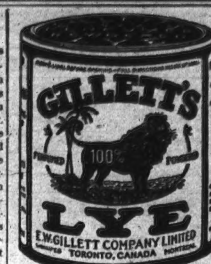

Extensive soundings were taken, and the greatest depth recorded was 2,700 fathoms.

American Branch Factories in Canada

The establishment of American branch factories in Canada continues this year to a greater extent than ever. Among the American industries to locate in Canada within the past few months have been a copper and brass concern at Toronto, cutlery manufacturers at Hamilton and Wexford, electric bulbs at Ottawa, hosiery at Guelph, automobile parts at Sarnia and Windsor, silk mills at Cowansville, auto tire plant at Hamilton, silk dyeing and finishing at Drummondville, and textile dyeing at St. John's.

It is held by scientists that a human being cannot live without a brain, which only goes to prove how mistaken scientists can be occasionally.

Minard's Liniment. Lumberman's Friend

Locomotive From Scrap Iron

Mechanical Genius of Buenos Ayres Completes Miniature Train

Working for eleven years, with a file as his only tool, a man in Buenos Ayres has made a miniature locomotive of scrap iron. The locomotive can be moved under its own power by the use of compressed air. The iron was not heated in the making but was worked cold. A small coal tender and passenger coach were made at the same time and the whole thing is a little more than six feet in length and weighs 170 pounds. More than 1,300 screws and 2,000 rivets were used in the work. The train is complete to the last tiny detail and is built on the model of the equipment used by the British railroads of that country.

For years I have never considered any of household remedies complete unless a bottle of Minard's Liniment was included. For colic, nervousness, flatulencies or children it excels, and I have no better remedy for a severe cold in the head, or that will give more immediate relief than a liberal use of the bottle through the nasal organs. It is essential, as it has in very many instances proved the value of a reliable cow's udder has again demonstrated its great value. I have never recommended it in the highest terms to all who have a bottle of cows, large or small. I think I am safe in saying among all who have a bottle of cows, large or small, covers for large a field of usefulness as Minard's Liniment. A real trustworthiness for man or beast.

CHAS. H. ROBBINS, Chicago, Ill.

States Building New Dirigible

Flights Across Poles and Around World Being Planned

Battleships have not been rendered obsolete by the building of bombing planes, but the ships must be built differently in the future. Rear-Admiral William A. Moffat, chief of the division of aeronautics of the United States navy, said in an address at the Pageant of Progress, Chicago.

A trustworthy airplane in the hands of a skilful pilot, he declared, is safer than an automobile. He asserted that dirigible is being built near Philadelphia that will be larger than the one destroyed in England a few months ago. Trans-continental flights to the North and South Poles and around the world are being planned, he said.

The most obstinate crows fall to rest! Holloway's Corn Remover. Try It.

For a Practical Test

The President—You told your class that a family of four could live well on \$718 a year. Are you sure of that?

The Professor of Domestic Economy—Absolutely. Reliable statistics prove it.

The President—I'm glad to hear it because we are cutting your salary 40 per cent. for the coming year.—New York Globe.

YOUNG WOMEN WHO SUFFER

Letter Tells Way Towards Relief—Lydia E. Pinkham's Vegetable Compound

Toronto, Ontario—"I suffered from the time I was a school-girl until I had taken your medicine with pain in my left side and with cramps, growing worse each year until I was all run down. I was so bad at times that I was unfit for work. I tried many doctors and patent medicines and was only relieved for a short time. Some of the doctors wanted to have an operation but I refused. Finally I learned through my mother of Lydia E. Pinkham's Vegetable Compound and how thankful I am that I tried it. I am relieved from pain and cramps and feel as if I have saved my life. You may send me a letter to help other women as I am glad to help them. Write to me at A. Goodman, 14 Rockville Ave., Toronto, Ontario.

Lydia E. Pinkham's Private Test-Book upon "All About Peculiar to Women" will be sent to you free upon request. Write to Lydia E. Pinkham Medicine Co., Lynn, Mass. This book contains valuable information.

W. N. U. 1485

Taste the joy of living!

THERE is no greater joy than perfect health—the heritage of those who obey the simple laws of Nature.

Drugs are useful in case of sickness, but Nature strongly objects to their continued use by normal, healthy persons.

Caffeine, the alkaloid in tea and coffee, is a slow but powerful drug. In the hands of a doctor, it is useful and beneficial. But taken regularly, as a daily stimulant, it often upsets the nerves, causing serious organic troubles.

Thousands have found health and satisfaction in Instant Postum—the healthful, wholesome cereal beverage made from roasted wheat. It is fragrant—delicious—satisfying—and safe.

BANDING WILD BIRDS

Over 500 bird lovers in the United States and Canada are now engaged in the interesting work of banding wild birds, and this new method of making ornithological observations has opened up such interesting and valuable knowledge with regard to the habits, life and migrations of birds that the Bureau of Biological Survey in the United States has taken over the movement and made it national in scope. Bird banding does not injure the birds themselves and by it intimate details of individuals and even character studies can be secured. Before Baldwin discovered the facts by banding who would have thought that the timid house wren sometimes leads a double life as judged by human standards, that the eternal triangle is not uncommon in bird relationships, and divorces in midsummer not unknown.

The method is extremely simple and consists merely of placing a small numbered aluminum band on the bird's leg, adjusted in such a way that it will not catch on the ring and yet so that the circulation is not checked. The birds are either taken from the nest while fledglings or are caught in a special bird trap. Marking birds in this manner was first introduced into America early in the nineteenth century when Audubon placed silver threads around the legs of a brood of Phoebe's and was rewarded by having two of them return to nest in the same vicinity.

In Europe, bird banding was attempted as early as 1710 but it was not until 1899 that it was undertaken systematically. In the United States active experimental work was begun in 1901 and between that year and 1909 several local attempts were either planned or prosecuted. In 1906 the work was taken over by the Biological Survey of the United States Department of Agriculture, and under its direction it is now being widely carried on.

Mr. S. Prentiss Baldwin, of Cleveland, Ohio, who handled 1,040 birds in February and March, in 1921, states that the birds soon become accustomed to being trapped and frequently fly straight from his hand to feed in the next trap. Careless or inexperienced handling may result in accidents, but these can be avoided if a careful study is made of the available literature and instructions implicitly followed. To avoid confusion only one set of numbers is in use on the continent and these are allotted by the Bureau of Biological Survey at Washington. Bird lovers who wish to carry on the work in Canada require a permit from the Canadian National Parks Branch which has charge of the administration of the Migratory Birds Convention Act in this country. Two reliable testimonials certifying that the applicant has sufficient ornithological knowledge to carry on the work are also required.

MISUNDERSTOOD

A young woman with a two year old child in her arms, boarded a train car last week and the conductor came round with his usual cry of "Fares, please!"

The young woman, who had the child on her knee, tendered a half-crown.

The conductor, being short of change, politely asked her:

"Is this the smallest you have?"

Pulling the child towards her, she replied:

"Oh, no; I've one three months old at home."

THE BLAIRMORE LOCAL UNION NO. 2004 CELEBRATED THE CONCLUSION OF THE FIVE MONTHS' STRIKE BY HOLDING A BIG PICNIC AT THE LOCAL ATHLETIC GROUNDS ON FRIDAY LAST. SEVERAL HUNDRED MINERS WITH THEIR WIVES AND SWEETHEARTS ATTENDED AND ALL MADE MERRY WITH GAMES, ETC., TILL LATE IN THE EVENING. THE CHILDREN, TO THE NUMBER OF ABOUT FIVE HUNDRED, WERE ENTERTAINED TO A FREE MATINEE AT THE ORPHEUM THEATRE AT 3 O'CLOCK THE SAME AFTERNOON, AFTER WHICH THEY WERE TREATED TO FRUITS, NUTS AND CONFECTIONS THROUGH THE GENEROSITY OF LOCAL MERCHANTS.

The Blairmore brass band was in attendance during the day and rendered popular selections.

The committee in charge desire to thank the following for donations towards the picnic and programme:

S. Trono, cigarette case.
Joseph Montalbetti, ten set.
Tony Pondelick, barrel soft drinks.
Henry Zak, two cooked hams.
The Palm Cafe, box cigars.
Ralph Fazio, half barrel soft drinks.
A. Brunette, half barrel soft drinks.
F. M. Thompson Co., one box pears.
2 boxes peaches, one box plums, 20 loaves bread, 200 pieces candy.
Cosmopolitan Hotel, 100 cigars.
W. Knight, barrel soft drinks.
Dr. Lillie, five dollars.
D. Lewis, barrel soft drinks.
Blairmore Pharmacy, ten dollars worth of assorted candy.
Knapman Plumbing & Heating Co., box cigars.
Home Bank of Canada, \$2.50.
Union Bank of Canada, \$2.50.
Emporer Pick, two barrels soft drinks.
J. B. Rial, five dollars.
Blairmore Cafe, box cigars.
P. Burns & Co., five dollars.
J. H. Farmer, two dollars.
Gillis & Mackenzie, five dollars.
A. J. Kelly, one dollar.
A. Morency, three lunch pails.
E. J. Pozzi, five dollars.
Blairmore Trading Co., \$2.50.
Lloyds Clothing Store, one dozen.
Scott Fruit Co., two boxes apples.
Mr. Charbonnier, \$20.00.

WITH APOLOGUES TO LONGFELLOW

Tell me not in mournful numbers
Advertising is a dream,
For the business man who slumbers
Has no chance to skim the cream.

Life is real! Life is earnest!
Competition's something fierce!
If for dividends thou yearnest,
Learn the parry, thrust and pierce.

In the business field of battle,
Mollycoddles have no place;
Be not like dumb, driven cattle;
Be a live one in the race.

Lives of great men all remind us,
We must bring the bacon home,
And departing leave behind us
Footsteps on another's dome.

Let us then be up and doing,
Otherwise we may be done;
Still achieving still pursuing,
Advertise, and get the "mon."

NEW FIRE DISTRICT

Under the prairie fires ordinance, a fire district has been created in the province as follows: North and west of a line starting at the point where the North Saskatchewan river intersects the fourth meridian, thence up stream to Edmonton, thence south along the C. P. R. to Calgary and Macleod thence south between ranges 25 and 26 to the international boundary. Regulations controlling the starting of fires in this fire area have been issued, requiring permits to be obtained to start fires within the district. Circulars have been issued by the provincial fire guardian urging the public to observe these regulations.

RELIANCE SCHOOL INK

The cheapest and most satisfactory way to buy ink for school use is in gallon jugs, or in kegs. Kegs are returnable at the price charged, while jugs may be refilled, ensuring against evaporation.

This means a saving to the board.

The Enterprise can supply Reliance Ink in kegs, jugs, or bottles, any quantity at the best prices.

London-Paris Planes Luxurious

Accommodation Is Same as First-Class Railway Coach

The Airways are steadily developing smoother and more luxurious travel as the railways did, but at a much faster rate. The latest type of Handley-Page saloon express, two of which went off from Croydon recently after being christened by Gen. Branker as his first performance as Director of Civil Aviation.

The new machines carry twelve people—four more than is usual at present—and 500 pounds of baggage. They weigh five and a half tons when fully loaded and have an average cruising speed of ninety miles.

The passengers can move about at will inside and each one has his own window, which can be opened. The machines are fitted with wireless telephones and travellers can telephone in London on the way by handing their message to the pilot. The accommodation generally is that of a first-class railway carriage, with racks for light luggage. Six more of the same type are being built.

Fast passenger aeroplanes between Paris and Cherbourg will now run in conjunction with the ocean services. The Cunard Steamship Company has arranged, as from June 1, with the Messageries Aériennes Françaises for an aeroplane service to connect with the arrival and departure of the express Cunarders calling at the French port.

By using the air service, passengers will have at least five hours in the journey to and from the French capital.

In the case of passengers arriving from New York, on landing at Cherbourg they will join a waiting motor car and proceed to the aerodrome from which place they will fly direct to Paris. Outward bound passengers can arrange for an aerodrome motor car to call for them at their hotel. Passengers can take a certain amount of baggage.

Canada's Fur Production

Regulations Governing Trapping Should be Rigorously Enforced

The toll which the world takes of Canada is paying that the fur trade may be kept supplied with raw material is enormous. The taking of nearly three million animals to supply last year's demand clearly indicates that great care must be exercised and vigorous enforcement of regulations governing hunting and trapping ensured, if the capital stock of wild life is not to be impaired. This great natural resource, the first to be exploited in Canada, is one of the most consistent producers. Given reasonable protection, it will continue to reproduce itself and provide a source of revenue to many of our widely scattered settlers, to the trappers who penetrate the wilderness, sometimes at great risk, and to the various branches of the fur trade and industry.

Canadian Children

Are Living Under Finest Conditions Says English Physician

The principal province of Canada is Canadiana. Not all of them know it, but I told them so. The finest water in the world is less valuable than the finest children I have seen anywhere in the world. Magnificent racial stock (not least in the Scottish elements), nurtured under conditions which could not be excelled—not only in the country but in the towns, especially the newer western towns—without saloons or smoke-blackened skies or slums (I was taken to slums so-called, which we would call garden suburbs in England)—but with all the things men live by; for the body, air and light and water and fresh food; for the soul, work and play and love and worship.—Dr. C. W. Saleeby, eminent English Physician.

He Gave In

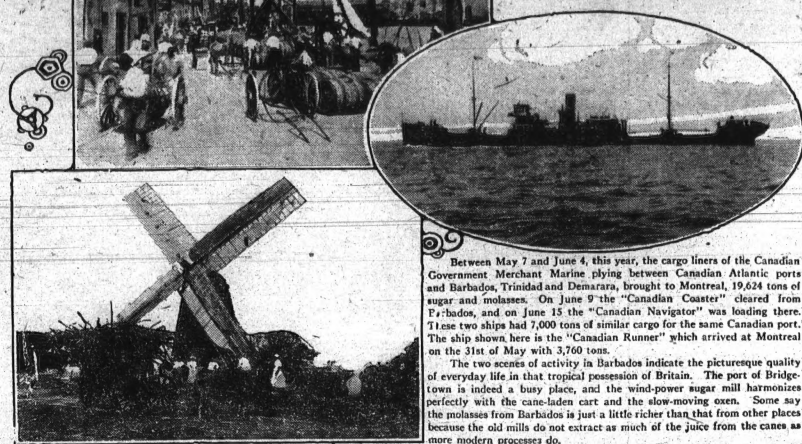

Scene: The dinner table. Husband and wife discovered in conversation.
He: You did!
She: I did not!
He: You did!
She: I did not!
He: One of us is a pretty clever liar, and only one consideration prevents me from saying which it is—
She: Modesty, I suppose.
(He gives in.)—London Sunday Pictorial.

Pa's In Bad Again

"Ma's terribly angry with Pa."
"What's the trouble?"
"They had an argument the other day and Pa ended it by admitting he was wrong."
"Well."
"Ma's just found out that Pa wasn't wrong at all."—Detroit Free Press.

The statement that there are 850 daily papers in Japan makes one rub one's eyes.

The "National" Link between the West Indies and Canada.

Between May 7 and June 4, this year, the cargo liners of the Canadian Government Merchant Marine plying between Canadian Atlantic ports and Barbados, Trinidad and Demarara, brought to Montreal, 19,624 tons of sugar and molasses. On June 9 the "Canadian Coaster" cleared from Pridobon, and on June 13 the "Canadian Navigator" was loading there. These two ships had 7,000 tons of similar cargo for the same Canadian port. The ship shown here is the "Canadian Runner" which arrived at Montreal on the 31st of May with 3,760 tons.

The two scenes of activity in Barbados indicate the picturesque quality of everyday life in that tropical possession of Britain. The port of Bridgetown is indeed a busy place, and the wind-power sugar mill harmonizes perfectly with the cane-laden cart and the slow-moving oxen. Some say the molasses from Barbados is just a little richer than that from other places because the old mills do not extract as much of the juice from the canes as more modern processes do.

Remarkable Feat of London Architect

Brick Piers Supporting Weight of 150 Tons Removed

To support part of a six-story hotel, weighing 150 tons, on wooden scaffolding and at the same time to safeguard its walls against falling-outwards by wooden shores bracing against another building on the opposite side, of the road, is the remarkable feat of hotel surgery which is being carried out in London.

The architect-surgeon who is superintending the operation is T. L. Yepper, and the "patient" is the Grand Hotel, Northumberland Avenue, W.C. It was recently discovered that the hotel, which was built in 1875, required strengthening, and it was decided to remove three of the brick piers supporting it and to reconstruct them with steel reinforcement.

Since a very slight deviation of the wooden temporary support facing the place of a pier might cause the wall of the building to move outwards, two flying shores of wood were erected across 25 ft. of street against a building opposite.

Although the alterations affect the building to a depth of 3 ft., the business of the hotel has not been interfered with, a partition hiding the work from the public rooms.

Common Fly Migrates Six Miles a Day

Scientists Captured One Thirteen Miles from Starting Place

Scientists are still working out the problem of where flies go in the winter—if they go anywhere. A series of experiments, reports the Journal of Agriculture, have been made with 234,000 specimens of flies. The flies used were marked by putting them into bags containing red chalk pigments very finely powdered and thus camouflaged they were allowed to escape.

The scientists then baited traps for the flies at measured distances from their place of liberation. They were thus able to find when and where the flies voyaged. They found that many flies migrated considerable distances, the common house fly migrating about six miles a day. One trap recaptured a pink house fly thirteen miles away from its starting place.

An Expert

A jurymen petitioned the court to be excused. "I owe a man twenty-five dollars that I borrowed, and as he is leaving town today for some years I want to catch him before he gets to his train and pay him the money," he said. "You are excused," the judge answered in a very cold voice. "I don't want anybody on the jury who can lie like you."—Boston Post.

In That Sense

"Heck—Your wife is certainly a remarkable woman."
"Peck—Think so?"
"Heck—Indeed I do. Don't you?"
"Peck—Well, she certainly is able to make more remarks than any other woman I know."—Boston Transcript.

A machine has been constructed by which an armless man can feed himself typewriter and even mend boots, by means of only his toes.

Power Station on River Jordan

Russian Engineer Endeavoring to Float \$5,000,000 Company

A dam is to be built at the southern end of the Sea of Galilee. The dam in part of a storage reservoir for a power station to be established six miles down the River Jordan.

GALLIE AND JORDAN are great names that will always speak to untold souls seeking salvation. These names now speak to worldly minds seeking profit. "Pinhas M. Rutenburg, a Russian engineer, is in New York inviting speculators to put their money into a \$5,000,000 flotation for a storage dam on the Sea of Galilee and a power station on the River Jordan, with sub-stations at Haifa, Jaffa and Jerusalem. M. Rutenburg is enfranchised with a monopoly on the distribution of electricity in Palestine and chartered with the exclusive right to develop power.

On Jordan's stormy banks I stand
And cast a wistful eye
To Canaan's fair and happy land,
Where my possessions lie.

Byron Was Offended

Resented Friend's Remark That He Was Getting Fat

It is said that Lord Byron, the great poet, continually feared getting fat. He once told a friend that everything he ate was immediately converted into tallow and deposited on his ribs. "He would exist on his heels and soda water for days; then, when he was so near starving that he could stand it no longer, he would mix up a horrid mess of cold potatoes, rice, fish, or greens, deluged in vinegar, and gobble it down like a famished dog."

One day one of his old friends said to him, "Byron, how well you are looking. You are getting fat."

Byron's brow darkened and his eyes flashed.
"Do you call getting fat looking well, as if I were a hog?" he demanded, and turning to the man with him muttered, "The beast, I can hardly keep my hands off him."

Byron never forgave the poor man who, in trying to pay him a compliment, had thus offended him.

Axle Grease for Pole

"Before Shackleton sailed south on the Quest," said a friend, "he got all kinds of boxes and packages from cranks—tea tablets, medicated whiskey, cowhide underwear, compressed fuel, and so forth. A club acquaintance sent him a small keg labelled 'Not to be opened—till the furthest point south is reached.' But Shackleton, a wild bird, opened the keg at once. It was full of lard or some such substance, and inside the cover were these words, 'Axle grease for the pole.'"

A Definition of Tact

Questions editor has been asked for a definition of the word "tact." Well, a certain woman, 56 years of age, up and left her husband and family in his ad, the husband wrote, "She may not be 56 because she looks like only 27." She's back home now. Get the great idea?—The Congregationalist.

The average wage of housemaids in Germany is said to be \$2.40 a month.

Flies Menace Livestock

Bulletin Showing How to Deal With the Pest

A bulletin dealing with the morphology and biology of a Canadian cattle-infesting black fly, which has proved so troublesome to livestock owners in Northern Saskatchewan, has been prepared by Professor A. E. Cameron, M.A., D.Sc., entomologist-in-charge at the University of Saskatchewan.

Many reports have been made by agriculturists at various times containing the fatal results following serious epidemics of the fly in Saskatchewan. In 1913, it has been stated on excellent authority, farmers of the Duck Lake district suffered the loss of about 100 head of cattle, horses and mules, and isolated instances of smaller losses have been reported from the Carlton and Rosthern districts in later years.

Among the natural enemies of the larvae are the may-flies, stone-flies, and a species of fish known as the suckers.

As a result of the experimental tests with miscible (phintas) oil, it has been shown that the larvae can be killed.

A certain amount of protection against the attacks of the females is secured for grazing cattle and horses from the smoke of "amudges," consisting of oil-ventilated, smouldering fire made of any kind of rubbish.

The animals may also be temporarily protected by being sprayed with oily preparations, which are renewed from time to time as their repellent effect decreases.

Too Much Gold Is Detriment

Accumulation of World's Supply Will Not Enrich Any Country

A prominent British financier is quoted by Mark Sullivan in the New York Evening Post as saying Britain will pay her debt to the United States in gold. "We will throw it to you until you are up to your neck and drowning in it, and yell for help," he says.

It is no idle threat. Gold is not real wealth, but merely the symbol of wealth, a medium for the exchange of real wealth, and the accumulation of the world's gold in this country will not enrich us. It will be a positive detriment to us. We are likely to learn by costly experience what we might learn more cheaply by the use of our wits—Commerce and Finance.

Proved It

Rich Uncle Sam might as well stop mooning about Miss Bute. She hasn't been in love with you. She's been after the money she thought you'd inherit from me.

Nephew—Impossible! Why do you think so?

Rich Uncle—I have proposed to her myself and been accepted.—New Haven Register.

Airplanes in Sardinia

Four cities in Sardinia have been linked by an airplane mail service which connect with a daily steamer for the Italian mainland.

Some men owe their position in society to their wives, and every thing else they owe to their creditors.

Storing Of Vegetables

How Best to Keep Perishable Farm Products and Where

An earth pit, a cellar under the barn driveway, a cellar under a building, and an isolated cellar, provide four ways in which farmers can best store their field roots and other perishable products. Methods in which the three cellars can be constructed for 500 bushels for the purpose are described in Pamphlet No. 10, new series, of the Dominion Department of Agriculture. The earth pit is fully dealt with in Exhibition Circular No. 57, and is therefore omitted in this pamphlet. If the soil is not particularly of the nature and amount of material required in each instance, the plans submitted have been designed with an eye to simplicity and economy in construction.

It is pointed out that the elements to be first considered for the preservation of vegetables in their natural state are ventilation, temperature, moisture, drainage, depth and location. All these matters are taken into consideration. The cellar under the barn driveway is of course intended only for the keeping of feed for the livestock. The plan given provides for a cellar 14 feet by 20 feet inside with a storage capacity of 750 bushels based on a depth of 5 feet. The cellar under a building is so nearly like the other cellars that no special description is thought necessary. Three types of an isolated cellar are dealt with and designated as C1, C2, and C3 respectively. C1 is a type that has been built with success for eight years at Leithridge, Alta. Experimental Station; and C2 one that has been in use at Rosthern, Sask. Station for half that time, also with satisfactory results. The one has a capacity of 500 bushels and the other of 1,500 bushels each based on a depth of 5 feet. C3 is different from the others, principally in the matter of its roof, two methods for forming which are given. It is also a little more expensive than the others, and the ground high, the most favorable conditions are offered for the cellars.

Many Nondescript Hogs

Hogs to Grade Select Must be of Bacon Type

Dominion Livestock Commissioner states that Canada today has more nondescript hogs than she had ten years ago, and that the general lack of high quality is apparent in every province. In substantiation of this statement he gives an estimate of the hogs that would probably grade as select for bacon purposes. In Ontario and Prince Edward Island the figures are 30 to 35 per cent.; in Quebec, from 30 to 35 per cent.; in Manitoba, from 20 to 25 per cent.; in Saskatchewan, from 15 to 20 per cent.; and in Alberta, from 10 to 15 per cent. This indicates pretty clearly the reason to which hogs are being bred to the bacon type in the several provinces. Right breeding is at the root of the matter, and there is evidently plenty of room for improvement in this direction. It is gratifying to learn that the Dominion authority that increased purchase of breeding stock was noted during the past winter as this cannot fail to have a favorable effect in the quality of production in the near future. In the absence of sows of the bacon type, a strong infusion of that type through the use of suitable boars would greatly improve the bacon quality of the thick-smooth type of hogs, which predominate in Saskatchewan and Alberta and cause a considerable extent in Western Ontario.

Meaning of Red Sunsets

Timely Warning When Soon During Hurricane Season

An approaching hurricane may affect the atmosphere and the rays of light passing through it for more than a thousand miles, says the Scientific American. When a true flame-colored sunset is seen during the hurricane season before the 31st of March, even when there is no particular fall pressure, it is wise to hurry to safety. This awe-inspiring phenomenon may precede the sea swell and upper-cloud movements by from twenty-four to forty-eight hours, and may be the only timely warning of the dangerous tropical storm of small diameter.

To Explore Ungava

Stops are now being taken for the organization of a Quebec Provincial Government expedition into the Ungava territory, the first object of which will be the establishment of a series of posts or stations, from which later on, the great task of exploring this territory and gathering information regarding its topography, rivers and streams, resources in timber and minerals, will be undertaken.

The sun, if it were a hollow sphere, would send a million globes as large as the earth.

RED CROSS FINANCIAL
AND MEMBERSHIP DRIVE

The Red Cross Society (Alberta Provincial Branch) has arranged to hold a campaign for finance and membership during the week commencing November 5th and terminating on Armistice Day, the 11th. There could be no more fitting time than this for celebrating with thank-offerings the great occasion when the world's Peace was proclaimed. Gratitude to the countless heroes who by their sacrifice made this possible cannot be honored in any finer way than by assisting the Society that has ever stood by the sick in war and now in peace. Never have there been more calls on the Red Cross than at the present time, but owing to lack of funds the Society finds itself unable to respond. It is a popular error that after the war the Red Cross ceased to function, but no greater mistake could be made. Last we forget—let us look at the soldier settler and his family in the remote parts of the province, far from medical aid, his wife and children have found that the Red Cross were ready to stand by them in time of trouble and lend a helping hand. At its different points on the prairie you can see the Red Cross flag flying over the tiny hospitals and health centres where human life is being saved from suffering, nay from death itself. The record of surgery done at these outlying points proves that many a time life has been saved because of immediate assistance. But it is in its pre-natal and maternity care that perhaps the most valuable assistance has been rendered to the war-brides who under the strain of new conditions were undergoing great hardships. The Red Cross nurse at her outpost Health Station is a true missionary. Many a mile over trackless prairie, with zero weather, alone, she has "carried" in her battle against disease, and to the lonely women in their hour of pain she has proved an angel. The prairie hospital is responsible too for giving instruction in home-nursing and mothercraft to the growing girls in the settlements, they travel many miles to see the right way to bath and care for the new-born babe. Foreign girls marry as a rule before they are out of their teens and although their parents have been unable to do much for them educationally the girls exhibit a keen desire to learn at the Red Cross lectures. Lantern slides on health and hygiene

THE SALARY "GRAB"

Alberta is said to lead the province of Canada with a \$2,000 reduction in salary for its members compared with \$1,400 in Ontario. Alberta, however, has yet to develop the bonus habit which for the past two sessions has brought the Ontario payment to legislators up to the \$2,000 mark.—Farmers' Sun.

The other provincial legislatures are mere amateurs at the game. They came down to this Province by the sea they would learn how our representatives raise their own salaries.

If the regular procedure taken to keep or attract too much publicity they put a special order in Council through. Our local members are not as ready as opposing the special "grab." The taxpayer pays the bill. Poor taxpayer, he gets it coming and going. —New Glasgow Free Lance.

EXCURSIONS TO
EASTERN CANADA

We have received word to the effect that the Canadian Railway has decided to make excursion fare from Alberta, Saskatchewan and Manitoba to all points in Eastern Canada during December and early January to afford an opportunity to the people in the prairie provinces to visit Eastern Canada.

are shown and literature of a popular type is distributed, the boys take lessons in First Aid and Accident and simple instruction in physiology. The Junior Red Cross has made it possible for many a cripple to come in to the specialist in the city and be cured. The Sick Children's Hospital in Calgary is always filled with needy cases from all over the province where free treatment is given to those who are unable to get medical care. The relief work of last year undertaken by the Red Cross provided clothing for thousands of destitute families who but for this timely aid must have suffered great hardships. The peacetime activities are such that every lover of mankind must approve and desire to assist, and in the November Campaign will afford everyone an opportunity of participating in the mission of mercy whose sign is the sign of the Cross. Note the dates—November 5th to Armistice Day.

SASKATCHEWAN TEMPERANCE
MOVEMENT

Opposition to the abuses that have arisen in Saskatchewan under the prohibition laws of that province has taken the unique form of a temperance organization which will oppose the "bone-dry" system. The Temperance Reform League formed at Regina a few months ago pledges itself to "assist temperance and oppose prohibition and other coercive measures." The assertion is made that it is promoted by the liquor interests, but this allegation is discounted by the fact that the liquor men are about the only interest not represented in its membership. Indeed, in Saskatchewan, the "liquor interests" are confined to men who are making money so fast out of illicit traffic that they have no wish that prohibition be abandoned. The membership is widely representative and embraces many prominent men, merchants, lawyers, ministers, doctors and labor leaders and so on. Among the several clergymen on the executive, Rev. W. C. Western recently made a very strong speech in which he especially dwelt on the fact that prohibition is not in accord with the teachings of Christianity as revealed by the New Testament. The Temperance Reform League will work for the repeal of the present laws and the substitution of a measure that will more effectively deal with the abuse of liquor in a more effective way than by driving it into illicit channels which have even proved to be secret.

Government control was once instituted in Saskatchewan, but never got a fair trial owing to political corruption in connection with the administration of the system. The new association will strive to secure the adoption of a sane system, honestly administered and of revenue producing character. It is reported progress will be had news for the prairie boot-legal.

Miss Marguerite Lindsay, of Montreal, who volunteered as a teacher with Rev. Henry Gordon in his mission on the Labrador coast, is missing and believed to have been drowned.

Another PRICE Suggestion
Biscuits, Buns and Rolls

BISCUITS What delight this word suggests, so tender they fairly melt in the mouth, and of such glorious flavor that the appetite is never satisfied. These are the kind of biscuits anyone can make with Dr. Price's Cream Baking Powder and these unusual recipes:

(All measurements for all material are level.)

BISCUITS

2 cups flour
1 teaspoon Dr. Price's Cream Baking Powder
1/4 teaspoon salt
1/2 cup milk or half milk and half water

Sift together flour, baking powder and salt, add shortening and rub in very lightly, add liquid slowly to make soft dough; roll or pat out on floured board to about one half inch in thickness (handle as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

CINNAMON BUNS

2 1/2 cups flour
1 teaspoon salt
4 teaspoons Dr. Price's Cream Baking Powder
1/2 cup milk
1 egg
1 cup water
1/2 cup sugar
2 tablespoons cinnamon
2 tablespoons melted butter

Send for FREE Cook Book—"Table and Kitchen"—149 Notre Dame East, Winnipeg, Can.

DR.
PRICE'S
CREAM
Baking Powder

Made from Cream of Tartar, derived from grapes. Pure, wholesome and unvarying in strength. Raises the dough perfectly.

MADE IN CANADA

Sift 1 tablespoon of measured sugar with flour, salt and baking powder; rub shortening in lightly; add beaten egg to water and add slowly. Roll out 1/2 inch thick on floured board; brush with melted butter; sprinkle with sugar, cinnamon and raisins. Roll at for jelly, roll cut into 1/2 inch pieces; place with cut edges up on well-greased pan; sprinkle with a little sugar and cinnamon. Bake in moderate oven 30 to 35 minutes; remove from pan at once.

PARKER HOUSE ROLLS

4 cups flour
1 teaspoon salt
6 teaspoons Dr. Price's Cream Baking Powder
2 to 4 tablespoons shortening
1 1/2 cups milk

Sift flour, salt and baking powder together; add melted shortening to milk and add slowly to dry ingredients stirring until smooth. Knead lightly on floured board and roll out 1/2 inch thick. Cut with biscuit cutter. Grease each circle with back of knife one side of center. Butter the small section and fold larger part well over the small. Place one inch apart in greased pan. Allow to stand 15 minutes in warm place. Brush each with melted butter and bake in moderate oven 15 to 20 minutes.

SALE OF EXTRACTS FORBIDDEN

Under the liquor act, regulations have now been put into effect forbidding the sale of extracts and tinctures as follows: Tincture of Orange, Compound tincture of Cardamom, compound tincture of lavender, tincture of lemon, tincture of ginger, orange wine, iron wine, wine of iron chloride, tincture of bitter orange peel, tincture of sweet orange peel, tincture of cardamom, tincture of lemon peel, tincture of ginger, spirit of bitter almond, spirit of juniper, compound spirit of juniper and aromatic elixir.

To Holders of Five Year
5 1/2 per cent Canada's
Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5 1/2 per cent interest, payable half yearly, of either of the following classes:—

- Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmaturing coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form, carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

invited to attend the above lodges.

Items of Local and General Interest

John Smith has died again, this
time in Nova Scotia.

Mrs. F. M. Pinkney has returned
from a holiday visit to coast
points.

Big advertisers all over the
country are increasing their ap-
propriation.

From the State of Indiana
comes word of the marriage of
William Nutt to Blanche Holt.

Joe McDougall has returned
from a vacation spent at the
coast.

A. M. Morrison has returned in
Coleman from a visit to Ontario
points.

The estate of the late Lord
Northcliffe is valued at four mil-
lion pounds sterling.

The coal output at the mines of
Great Britain for the week end of
July last was 4,550,000 tons.

A seam of pure anthracite coal,
with slate above and below, has
been reached near Sudbury, Ont.

Mr. W. L. Drake, school principal,
has returned to Frank-
lin, spending his vacation at his
home in Saskatchewan.

Whiskaway, the colt that took
away the crown from the "Tin
Sniffer" Morvich recently, was
sold at New York for \$150,000.
Miss Olga and Annie Beck-
with returned to Pincher Creek next
week to resume their studies at
the convent.

Eighteen members of the crew of
the French dragoons, France,
arriving since the ship capsized
in Quileron Bay, near Brest,
in Saturday.

Charlie Chestnut is back with
us, after an absence of some
months at the coast. He has
taken a position at Greenhill
mine.

The Ford Motor Co.'s plant at
Highland Park, Dearborn and
River Rouge, Detroit, will likely
close down on September 10th,
because of lack of fuel. The
suspension of these plants will
affect upwards of 50,000 workers.

The Caidon Review remarks:
"That Hitlerist man may have
committed suicide. Introduction
of the mysteries of a religion as
viewed as wild as that described
by witnesses at the murder trial
was enough to upset the mind of
a brighter man than he was."

FAMILY REUNION AT DOMINION

A most pleasant family reunion
took place yesterday at the home of
Mr. and Mrs. Charles Rennie, Domin-
ion, C.B., when their nine married
daughters spent the day with their
parents. Those present were Mrs.
L. G. Martell, Lawrence, Mass.; Mrs.
L. S. Phillips, Prince Albert, Sask.;
Mrs. J. W. McMillan, Sydney, Mrs.
D. A. McCraith, New Glasgow; Mrs.
Hugh McIntyre, Louisville; Mrs. Rose
McDonald, Bridgeport; Mrs. Isabel
Martin, Prince Albert, Sask.; Mrs.
John Hallett, Coleman, Alta.; and Mrs.
John Nicholson, Dominion. The two
sons, John in Vancouver and William
a Prince Albert, were unable to be
present. This is the first occasion in
over twenty years when the daugh-
ters have been able to be all together
and they are making much of their
visit to Dominion. A big family din-
ner was served, the table being de-
corated with sweet peas and dahlias.
The only little cloud present was the
memory of their beloved sister, Mrs.
R. E. Tharber (Agnes) who died sev-
eral years ago, and who was a favor-
ite with all who knew her. A few re-
latives and friends were present dur-
ing the afternoon and the day was
pleasantly spent in reminiscence of
past years and music. — Glace Bay
Gazette.

Cowley Happenings

The Women's Institute dance
in Lundbeck on Friday night
was well attended.

J. J. Robinson is relieving Nan
Cyr in his store during the
harvest.

C. J. Bundy and family are
spending their vacation in Nova
Scotia. He is relieved in the
hospital by H. Hoad, of Okotoks.

Mr. Moir, of the Alberta Pacific
elevator, has accepted a new
berth, being relieved here by R.
E. Cowie, who has moved his
family into the Hotel du Nord.

The Women's Institute held
their regular meeting on Satur-
day last, when they were address-
ed by Mrs. Stannett, of Lund-
beck Institute.

Mr. and Mrs. R. G. Morrow, of
Hillton, Ontario, are visiting their
son, Mr. R. O. Morrow, manager
of the Union Bank here.

Misses R. Blackburn, Mariel
Murphy, Clara Fortier and W. L.
Drake all left for Calgary on
Saturday for the opening of nor-
mal school.

A large number of Cowley
people have taken up golf. The
second beginners' competition
was held on Saturday last and an
enjoyable afternoon was spent on
the links.

Paul Hargrove received slight
injuries when his motor cycle
collided with Ralph Esterbrook's
car west of town the other night.
He is about able to be around
again.

Cowley school opened on Mon-
day, with Miss N. McWilliams in
charge as principal, and Miss
Anderson in charge of the junior
room. The enrolment is quite
heavy.

Harvest is in full swing and a
week will see the wheat cutting
pretty well done. A month of
dry warm weather has ripened
the grain fast. The average grade
will be number one. Except for
the harvest, rain would be wel-
come.

The executive of the School
Board had a busy meeting
on August 28th, when all com-
mittees were appointed and
arrangements made for the fair to
be held on September 8th. It
is expected that a large display
of livestock will be shown than in
former years.

The teacher was exasperated at
the inattention of her class. The
lesson had been on machines, and
Edison's inventions had been
mentioned.

"Now, then," asked the teacher
impatiently, "from what was the
first talking machine made?"

After a lengthy silence a voice
from the back exclaimed:
"Please, miss, from a rib!"

The fence around the school
grounds is nearing completion
and makes a big improvement to
the appearance of the grounds.
The local public are rather in-
dignant, however, that the work
is not being done by a resident
taxpayer.

A London doctor, who had given
the matter some extended investi-
gation, has come to the conclusion
that there is no rule to be fol-
lowed about hours of sleep, and
there is no reason, he says, why a
woman should have more sleep than
a man. It is a matter for the in-
dividual. One person gets as
much benefit out of a habitual five
hours' sound sleep as many others
derive from eight or nine hours'
lighter slumber, for quality of
sleep is as important as quantity,
a point that is often overlooked.

Rob Patterson returned to town
on Monday from Calgary, where
he has resided for several months.

Mrs. Rush has returned to
Frank, where she is spending a
while with relatives.

The open season for mountain
sheep and goats commences to-
morrow.

Nearly one third of the 236,000
widows in England have re-
married.

Rev. Father Chavallier, O.M.I.,
of Edmonton, is a visitor at St.
Anne's Rectory this week.

A prohibition phibetic taken
in Sweden resulted in favor of wet
by one 74,000 majority.

There are over 260,000 auto-
mobiles and motor vehicles in use in
the State of Massachusetts.

Sydney, Nova Scotia, expects
in the near future to have a \$300,-
000 hotel.

If a man is down in the month,
let him sit where a mosquito can
get at him and he'll soon come
up to scratch.

A. E. Ferguson, undertaker, is
having a large addition built to
his residence on Victoria Street
east.

If we ever conquer selfishness,
we will have done the biggest
thing since the creation of the
world.

J. A. McDonald and family
have returned to Coleman from
a several months visit to points
in the Maritime Provinces.

Farmers admit that fine dry
weather and clear moonshine is
responsible for the rapid ripening
of crops.

French modistes say skirts will
be tighter in the spring. Well,
then, they will have to build
thinner ladies, that's all.

A local motor mechanic's
daughter had never before seen a
dachshund. "Oh papa," she ex-
claimed, "see what a long wheel-
base this dog has!"

The liquor sales of the British
Columbia government netted two
and a half million dollars in the
first year. The proceeds, less a
small reserve, to school and
hospital upkeep.

Several Chinese, prominent in
Canadian and American financial
circles, visited Blairmore the
early part of the week in the hope
of interesting local Chins boys in
investing in a Canton building
scheme.

Baron Byng, governor general,
and Lady Byng and party, who
have been touring in Alaska, will
visit points in Alberta during the
second week of September, return-
ing to Ottawa.

New Zealand sheep owners are
setting aside £200,000 for the re-
lief of distress among the families
of men who have been connected
with the British navy and mer-
cantile marine.

At a meeting of the executive
of the Board of Trade last week
it was decided to protest
against the proposed removal of
the day trains from this line.
Now that the mines have started
operation and the coal and crops
are moving, there is no doubt as
to the day train paying.

The local school opened for the
fall term on Monday, with the
following staff in charge: Prin-
cipal, D. M. J. Conway, Miss E.
M. Fulton, Miss B. Pinkney, Miss
B. Douglas, Miss J. Galley, Mrs.
W. Galley, Miss Rhoda McLaren,
Miss Cecilia Marquis, Mrs. I.
Pinkney, Mrs. Joe Bond, Mrs.
George Bond. These latter three
are temporarily substituting for
Miss Davis, Miss Keith and one
to fill.

YOU'LL SURELY BE WELL SUITED

with the suit we make to
your measure. Made up
in the classic style, from
cloth of exclusive pattern.
In the very best of tailor-
ing craftsmanship it will
be a suit that will carry
individuality and distinc-
tion in every line. Stop
in and be measured. You
can afford to at our prices.

Tailor to the People of The Crows' Nest Pass

Phone 85 Blairmore

A very delightful afternoon tea
was served on Sunday last at the
summer camp of Count Valentin
Rinaldi, just south of the North
Fork golf course. About twenty
people were present, the ladies oc-
cupying the upholstered berths,
dressed in suitable rage. Dr.
Lillie poured the tea, Pete Mon-
talletti cut the loaf, while
"Shorty" split the trans. Carl
Smith washed the dishes, while
his wife in a sweet content voice
sang: "And better days are
coming." Owing to scarcity of
bathing suits, that part of the
program gave place to berry
picking and fishing.

Nearly two hundred and fifty
children under nine years of age
were burned to death in Canada
last year, exclusive of Quebec, for
which province no figures are
available.

Canadians East And West Have Launched Campaign For More Tree Planting

Throughout Canada the greatest activity and enthusiasm has prevailed this year in regard to forest tree planting. It is safe to say that more trees have been planted in the spring of 1922 than in any previous spring in the history of Canada. In the eastern provinces and on the prairies, the cities, towns and villages have planted trees by the thousand along the streets, and in the parks, and where provincial highways have been constructed trees have been planted along these under systematic plans. These are all shade and ornamental trees and they are planted for aesthetic rather than economic reasons. At the same time on the prairies, especially the planting of trees in urban centres helps along the movement in rural districts. But the movement has not ended there. In addition to the five or six million trees sent out by the Indian Head and Saskatchewan Dominion Forest Nursery Stations to farmers to plant shelter-belts all over the prairies and those sent out for like purposes and to restore woodlots from the Ontario and Quebec Nursery Stations at St. Williams and Berthierville, respectively, there has been a much larger planting and seeding of purely forest trees than ever before. The Dominion Government Forestry Branch has planted trees at Petawawa, Ontario, forest experiment station and on a number of its forest reserves in the prairie provinces to a total number of about 150,000; several of the big pulp and lumber companies have done considerable planting, and there has been a forward movement in the municipal forest plantations in Quebec and Ontario. In the latter part of the year the scheme of county and township forests devised last year was put into active operation. In Simcoe county the first tree in the county forest plot of one thousand acres, near Camp Borden, was planted by the mayor with appropriate ceremonies. It is expected the whole plot will be planted in ten years. In the same county two townships and one village planted plots of ten acres each, and in Norfolk county twenty thousand seedlings as a beginning were planted on the municipal forest. Other townships set out trees and the counties of York, Ontario, and Durham, are laying out nurseries and getting ready to start next year.

Chinese Are Born Gamblers

Has Fascination For Even the Wealthiest of Orientals
Peang, in the British Straits Settlements, which was visited by the Prince of Wales on his eastern tour, is famous throughout the east for its luxuriant beauty, writes Richard Curle in the Daily Mail, Georgetown, Georgetown, capital, flourishes as a port, and into it every day from the outlying suburbs rich Chinese leaning back in their cars and gazing incuriously about them from behind their gold-rimmed spectacles. It is indeed, a Chinese town in all but name, and the chief things that strike you as you wander about its streets are the Chinese shop signs and the Oriental life busy around you. The Chinese certainly banker after display—a kind of childish display which is not so much conceit as a sort of national instinct.

When a Chinese in the Straits becomes wealthy, when from a coolie he rises to a lawyer (an influential person) his first desire is to have a residence worthy of his prosperity. He may very probably inhabit only one of the rooms, but there it is for all to see, and there it is for the few important social engagements of the year.

He likes bright colors and fantastic designs. And, somehow, in the glowing sumptuousness of the tropics, these things of his harmonize quite well with the surroundings.

The Chinese is a born gambler. From obscure beginnings many a Straits Chinese has grown immensely rich, and then again has sunk into poverty.

It is seldom that a Chinese will "sell out" and invest his money safely. Even when he has made a fortune he continues to gamble.

Real Movies

Helen, aged three, was taking her first train ride and was passing through a woods. "When then?" she asked her mother, pointing to the trees.

"Those are trees," was the answer. "Where are they going?" she asked. "Judge."

No attention is paid to a chronic liar when he utters an occasional truth.

W. N. U. 1428

Boogey of German Menace

Stands in Way of Prosperity Says Lord Beaverbrook

Lord Beaverbrook, the principal guest at a luncheon given by the London Commercial Club said he was glad to see, though some of them had been predicting the approach of prosperity for weeks past, that now they found themselves supported by many public men, including the President of the Board of Trade.

He knew of only one impediment which stood in the way, and that was a boogey man. It was as it used to be, the German menace. Before the war the German menace was of an industrial character. They were going to deprive us of our industry; they were going to take from us our markets. How we were going to be destroyed by the collapse and ruin of Germany. German finance was rushing through a mad period of inflation, which he prophesied would lead to a crash, which must involve repudiation, before we could resume their normal state again.

Our public men were concerning themselves about the restoration of credit in Central Europe, while near at home, over the Irish Channel, lay a market buying from us six million a year, or more than ten times the goods we sold to Germany. Let them turn away from Central Europe to where the light of dawn was beginning to begin to fertilize the fields of England, Scotland and Ireland, of Australia, Canada, America, Argentina, and other foreign markets, where British commerce and industry would prosper, even though there was no real awakening in Central Europe.

Testing Varieties of Grains

Important Work in the Interest of Agriculture

An idea of the extent and importance of the work in the interest of agriculture carried on under the Experimental Farm system of the Dominion Department of Agriculture can only be obtained by a study of the reports of the twenty-one different farms and stations, the dozen or so sub-stations, and the eighty illustration stations, of which the farm at Ottawa is the controlling centre. One of these reports that has recently made its appearance is that of the Dominion Cereals, for 1921. In that year, Dr. Saunders states, there were 756 plots of all sizes at Ottawa, representing 600 fixed varieties of grains. Detailed tables are given of the result of the tests made in 1921. Numerous cross-bred sorts which have not yet been named and are in a preliminary stage, are omitted. Of these tests, 112 were of varieties of spring wheat; seven of summer and spring wheat; 103 of barley; five of spring rye; 29 of field peas; 17 of field beans; 137 of flax; and 18 of barley for hay. In addition, 629 varieties of grain were tested for the Dominion Cereals at the different farms and stations located in all parts of the country. Experiments for the control of smut were carried on last year, and 10,061 distributions of free seed samples were made, consisting of 2,250 samples of oats, 2,096 of wheat, 1,885 of barley, 522 of flax, 815 of beans and 1,463 of peas.

Marketing Seed Wheat

Alberta Has Comprehensive Plan for Marketing Pure Seed

Plans are completed here by officials of the Alberta Provincial Department of Agriculture and Alberta Agricultural College in co-operation with the Dominion Seed Branch, for a comprehensive scheme for marketing seed wheat, oats and barley. Pure seed will be distributed to select growers and the seed produced from this will be inspected by the Dominion Government seed officials. The marketing of the seed will be handled by the Provincial Government.

Got a Shining Mark

The gunner who slew Field Marshal Sir Henry Wilson at the door of his home in London were not more bloodily minded or red-handed than their comrades in the army of Irish murderers. In taking human life they did only what hundreds of these had done or attempted to do. They simply have the bad misfortune of successfully singling out their victims a more illustrious public servant of the British Empire than any previously brought down by their vicious peers.—Toronto Mail and Empire.

Be fair to your local merchants. Ask to see his goods and compare prices before sending your money to the mail order houses. You will find that it pays.

The Helicopter Puzzle

Solving the Problem of Building an Airship that Can Rise Vertically

Some time ago the British Air Ministry offered a prize for the successful invention of aircraft capable of rising vertically from the ground and of hovering over any point. Rumors are afoot that this difficult problem has been solved by the same British engineer who invented the gyroscopic motor, in which a vehicle running on a single wheel track maintained itself upright by means of a gyroscopic. Particulars of the new development are not yet available, but there is every hope that it will provide a satisfactory solution. It may be recalled that several years ago another British inventor suggested a design by which an airship heavier than air could be made to rise itself by means of electric power. The design was abandoned as it was provided by a series of wings, each operated in a particular way by means of a small electric motor, all the motors receiving their power from a central electric generator. The action of each wing was similar to the peculiar movement of a bird's wing, and the inventor claimed that a craft built on these lines would be able to rise almost directly from the ground and maintain itself steadily at any reasonable height.

Measuring River Flow by Radium

British Scientist Has Developed a Unique Method for Determining Flow of Rivers

If anyone were to suggest that there is any connection between radium and the measurement of the flow of rivers he would probably be scouted as a dreamer. Nevertheless, a British man of science has developed a very effective method of measuring the flow of rivers by means of a solution containing just a trace of radium. The method he proposes is a development from an existing system which involves the addition of large quantities of salt solution to a river. What was done was to introduce a certain quantity of salt at a particular point and to collect samples of the water at various points lower down in the stream, thereafter testing the strength of "saltiness" of the solution. With the new method only a few gallons of solution containing a little radium will be required. The solution will be fed into the river under constant pressure, and samples will be taken lower down the stream and conveyed to the laboratory and stored in ordinary flasks for 10 or 12 days. They will then be tested by a simple electrical method for the presence of radium, and by means of this test the rate of discharge of the river can be accurately determined.

Old Sergeants Inn

Old Sergeants Inn, at the Fleet Street end of Chancery Lane, London, dates back to the time of Henry IV, but some chroniclers say that the sergeants only went there in 1730, when they quitted Sergeants' Inn on the south side of Fleet Street. The inn, save and except the dining hall, was rebuilt in 1837-8, but forty years later the inn itself was broken up, and the buildings have ever since been used as offices. Old Sergeants' Inn has Clifford's Inn as a near neighbor, being only separated from it by the iron gateway.

Why do some men swear to love before marriage, and love to swear afterward?

Cortez settled in Vera Cruz in 1520.

Britain's Civilization

Future Generations Will Still Find Empire Going Strong

Dean Inge thinks that the Victorian age saw the culmination of British civilization. "The twentieth century," he said in his Cambridge lecture, "will doubtless be full of interest, and may even develop some elements of greatness. But as regards the fortunes of this country, the signs are that our work on England ends with the whole world as our stage is probably nearing its end. Europe has sacrificed its last fifty years of primacy by an insane and suicidal struggle. American has emerged as the 'tertius gaudens'."

As the opening and development of the Atlantic trade favored England, so now, the Dean thinks, "the Pacific stage, which is now beginning; must inevitably give the primacy to America. 'Where,' he asks, 'shall we (the English) be thirty years hence?'"

Since the good but gloomy Dean figures, our surmise is that another generation will still find the British going strong in all parts of the earth and active in commerce and government. "The United States, as a hemisphere, is better situated for the Pacific trade than the United Kingdom, but Canada reaches to the Pacific. Australia and New Zealand have every access to it, South Africa borders on it, and the Suez Canal is still open. The British Empire is still without facilities for doing business in the new era."

Have the British races declined in vigor or have they thought they had, and yet on it, but he lost his wager.

They say that deep plowing by shells has increased the fertility of certain fields in France, with resulting crops that are unprecedented. The war has plowed England very deep. Her coming leadership may derive from lower social strata than she has drawn on heretofore, but there is nothing necessarily ominous about that. The racial stuff is there.—E. S. M., in Life, New York.

Oil Developments

The Age of Oil is Making Steady Headway

Oil hunting is now regarded as a quite congenial and popular occupation. A local syndicate is taking up the active development of the Hay River region during the present summer, and the work planned, it is understood, is on the most extensive scale of any yet done in the Great Slave Lake or Athabasca areas. Prominent capitalists of industry everywhere are rallying to the support of schemes that tend to make oil yields more plentiful. Simultaneously oil fire extinguishers are being tried out with great success, and the latest of these is one that will tend to protect the big oil-burning liners and huge tanks ashore. The age of oil is making, it flows, certainly steady headway.—Montreal Gazette.

British Empire Exhibition 1924

Preparations are actively going forward for the great exhibition which will be held near London, England, during 1924. The task of organizing the shipbuilding, marine, mechanical and general engineering sections of the exhibition, which will form quite the most magnificent display of British engineering triumphs, has been placed in the hands of the British Engineers' Association. This association will allot space to the various branches of British engineering and will ensure that the exhibits will be representative of the best modern practice in British engineering.

Greenland Has Assumed Considerable Importance As A Commercial Country

Forgeries Ruining

Egyptian Market
Collectors of Antiques Afraid to Buy Historical Treasures

"The manufacture of antiques is carried forward on such an extensive scale in Egypt particularly at Cairo, that it now has a place in reports on the industries of the country," says Professor Flinders Petrie, the famous Egyptian archaeologist in an interview in the Daily Chronicle.

The forgeries of Egyptian antiques are often so well executed, that even the most experienced collectors are deceived by them. Large sums of money have been paid for articles that were considered genuine treasures but have now been pronounced spurious or of doubtful origin. So strong is the suspicion concerning the authenticity of scarabs and various bronze and gold ornaments and other articles alleged to have been found in Egypt, that many collectors are afraid to risk buying them, and in an excess of caution often turn down antiquities that are undoubtedly genuine. Thus the forgeries have largely ruined the market for Egyptian historical treasures.

Flying Fire Engines

Good Suggestion of Chief of New York Brigade

Among all the plans for increasing the destructive power of aeroplanes and making them more formidable against cities in war-time, it is a relief to hear that there is a possibility of using them for helpful instead of hurtful purposes.

The chief of the New York Fire Brigade suggests that the best method of extinguishing fires is to have flying fire engines. These would not attempt to put out fires with water. They would hover over the burning buildings and drop into them fire extinguishing chemicals.

This imaginative enterprising fire brigade commander foresees an other value in such aeroplanes. When people are driven by fire on to the roofs of buildings it is usually very difficult to rescue them. The flying machines would take them off. Inventors are urged to perfect the helicopter, which will be able to hover by means of whirling vanes.

Weather Influences Book Buyers

Sales Less in Warm Weather Says London Post

The psychology of book buyers is of some concern to the book world, remarks the "Way of the World" columnist of the Morning Post. It would seem that a hot spell has a decided influence on the purchase of books. The interpretation of this interesting fact may be that, instead of wandering into a bookshop as on a rainy day, the reader is lured to ice creams and soda fountains. Some remedies suggest themselves. Booksellers may find it convenient to have soda fountains on the premises, by which poetry and cooling drinks may be enjoyed together. Or, again, the model public house of the future might contain not only seats for the tired, which they seldom have today, but a library of all the latest books.

The Locomotive of Business

Ceasing Advertising is Like Taking Engine Off Train

William Wrigley, Jr., the successful chewing gum magnate, talking with a smoking car audience the other day, was telling the others how much a year the chic people invested in advertising.

"But, Mr. Wrigley, you've spent millions of dollars and created a splendid demand now; everybody talks about and chews Spearmint. Your demand is steady and growing. Isn't it a waste to continue spending so many hundred thousand dollars a year in publicity?" one of his auditors asked.

The Spearmint king thought a moment, and then replied: "My friend, if it were to stop advertising, it would be just like taking the engine off this train. It would stop down, and after a little while stop. Advertising is the locomotive of business, and if you don't have it, business comes to a stop."

The laboring classes of Seattle live principally on vegetables, with occasionally bread and a little dried fish. The average remuneration of bank clerks is twelve shillings and sixpence a week.

Trouble sometimes visits a man who isn't looking for it.

Experience teaches people lots of things they would rather not know.

Will Greenland become a great commercial centre and a port of call for travellers between Europe and America?

This is the romantic possibility that is opened up by the proposal to use Greenland as a half-way house in mid-Atlantic in the round-the-world flight.

Ten or twenty years ago the suggestion that Greenland might become a place of real importance in the world's life would have been laughed to scorn; but already the great bleak land in the north, hitherto regarded as a mere icefield somewhere near the North Pole, is being spoken of as a country about which the nations may as well concern themselves.

It used to be thought of little practical importance whether this country or that claimed rights over Greenland, though since 1771 it has been a Danish colony with traders and officials representing the Government of Denmark.

Now, however, with all kinds of commercial possibilities opening up, the rights over Greenland have assumed considerable importance, and already Denmark and Norway have been in dispute with regard to them. The King of Denmark, too, has thought it worth while to visit the country—the first time in history that a ruling monarch has ever been to Greenland.

The country is really an island—the largest in the world if Australia is regarded as a continent—and it contains over half a million square miles, of which about three-fifths in the interior are covered with a vast glacier.

Round the coast, however, the island is quite habitable, and there are about two hundred small towns and settlements, including the capitals, Godthaab and Godhavn.

Many valuable animals and birds are found on the island, the reindeer and musk-ox providing food; and the polar bear, wolf, fox and hare yielding warm skins. Over sixty kinds of other mammals, including the musk deer, kinds of plants are found. Broccoli, spinach, radishes, lettuce, turnips and leeks are grown; and in the south rhubarb ripens and potatoes grow to a useful size. The whaling industry, which will be able to hover by means of whirling vanes, is a valuable asset of the country, and now there is some prospect of minerals being worked there on a large scale.

Graphite, is abundant, soapstone is found in considerable quantities, copper has been discovered at various places, and there is coal near the northern capital and elsewhere.

But the most important mineral is cryolite, which is found exclusively in Greenland. It is a colorless substance somewhat like ice in appearance, and is an ore of aluminum. At one time this was the only source of the metal, but now aluminum is also extracted from bauxite. Cryolite is used extensively in the making of optical glass and iron enamel, and all comes from Greenland. Commercial men are anxious to develop a country which promises so well.

A town with large hotels and stores of the various kinds needed in Arctic flying is quite possible in the south of Greenland, and the country might become a regular holiday resort for tourists.

It is a fascinating prospect for what used to be regarded as a valueless No-man's Land. Things have developed remarkably in recent years, and already the Eskimos have their parliament and municipal councils, their law courts and churches, and their newspaper.

How Fires Start

One of the most frequent forms of involuntary incendiarism known is the way thoughtless individuals—generally smokers—throw away matches without taking the simple precaution of blowing them out, and assuring themselves that they are not smoldering. This is a matter of a second or two, although they were perfectly willing to spend fifteen seconds' time in lighting the match and lighting the tobacco. This careless practice is universally prevalent throughout the country.—Deputy Fire Marshal Law, Ontario.

Settlers Come to Canada

During the month of May there entered the western provinces via ports in the western district 1,620 settlers from the United States, and these 468 were farmers and 694 were women and children, nearly all being the wives and families of farmers. They brought with them \$277,000 in money and effects valued at \$25,294.

Books, when first printed, had their leaves printed on one side only the blank sides being pasted together.

THE FINAL TEST

The steadily increasing percentage of satisfied Imperial Polarine users is convincing proof that the right grade of Imperial Polarine is giving the greatest degree of lubricating service and satisfaction to Canadian automobile and truck owners.

Check up your car on the Imperial Chart of Recommendations. Use the grade of Imperial Polarine Motor Oils recommended exclusively.

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargyle Mobiloil.

MANY CHANGES IN ALBERTA LAW ON DUCK SHOOTING

Alberta nimrods will open warfare on feathered game Sept. 1, the official opening of the season.

A number of very important changes in the law governing hunting of game birds this season are worthy of special notice by sportsmen. Chief among these is the following: "No person or persons shall deal or traffic in the flesh of any big game or game bird." This totally bars hotel-keepers and others from placing the toothsome Mallard roasted, on his dining table for guests and will deprive many from enjoying roast duck in future. The duck season opens Friday, September 1st.

Game birds must not be placed in cold storage before September 20, and the bag limit is 30 ducks per day, with

a total of 200 for the season. It is now unlawful to carry a loaded shot-gun or rifle in, on, or any vehicle upon a public highway and hunters guilty of discharging a shot-gun or rifle upon a public highway are now liable to a very heavy fine.

Ducks, chicken and partridges are very plentiful this season throughout Alberta. Shooting will be very difficult in places as the dry weather has dried up most of the small sloughs. This has caused ducks to congregate on the larger bodies of water and it may be difficult to keep them moving.

Grave danger exists that young hunters may be tempted to use a .25 rifle to raise the birds. A bullet striking the water far out will ricochet and endanger the lives of other hunters hidden on the far side of a lake. The price of a bird game license

for residents remains the same, \$2.25 for the season, but sportsmen will welcome the tidings that the cost of loaded shells has been decreased by 10 per cent.

HUSBAND'S STORY WILL AMAZE BLAIRMORE

He says: "Adler-ka helped my wife for gas on the stomach and sour stomach in TWENTY MINUTES. It works beyond greatest expectations." Adler-ka acts on BOTH upper and lower bowel removing foul matter which poisons stomach. Brings out all gases and sour, deacidifying food. EXCELLENT for chronic constipation. Guards against appendicitis. Adler-ka removes matter you never thought was in your system and which may have been poisoning you for months. BLAIRMORE PHARMACY.

Miss E. M. Fulton returned from Nova Scotia last week end, where she had been enjoying a vacation.

CELEBRATES SEVENTIETH BIRTHDAY

As a result of the tea given at the home of Mrs. Kidd on Thursday evening last the neat sum of \$36.05 was netted and handed over to the building fund of the Union church.

Mrs. Kidd is one of the oldest and most highly respected of our citizens and adopted this unique method of celebrating her seventieth birthday. Though well advanced in years, she is still in enjoyment of perfect health. Friends from all through the district of all classes, took occasion to avail themselves of Mrs. Kidd's hospitality, and all wished her many happy returns of the day and the hope that the allotted three-score-and-ten will not conclude her services to the community.

Mrs. Kidd is also a pioneer, coming here in the early days, when she operated a popular boarding house, then known as the Cement Lodge. Largely attributable to her generosity, the Baptist church, now occupied by the Union congregation, was founded.

It is said that the ex-kaizer is to bring libel action against a number of newspapers which gave publicity to a strange account of the manner in which naval Lieutenant Von Huhke met his death in June, 1907. It was alleged that the kaizer, during one of his trips with the fleet to Scandianavia Waters, struck the lieutenant, who retaliated with a blow in the face. He was arrested and condemned to death by a court martial, but was given permission to commit suicide by means of a motor-cycle accident.

Through a permit issued by the Soviet Government a Chicago firm has shipped 3,000 cases of soap to Russia, ere's seeping.

"John, dear, for years the humorists have joked about the bride's first apple pie." "Yes, dear?" "So my first pie will be a lemon." And it was.

Mrs. W. Howe spent a few days in Lethbridge this week, visiting her daughter Mrs. T. Murphy.

The whist drive and social given by the Rebekahs on Thursday night last was the best and biggest event yet. About forty tables were operated and good prizes were awarded. Following luncheon, served at 10:30, a varied programme of games, song, step-dancing, quadrilles, etc., filled the time till the wee morning hours. Mrs. D. A. Howe and Dave Martin contributed to the vocal side of the programme, while Meera, James, Snyder and Royle at the piano, and Frank Beebe at the violin helped to keep up the instrumental end. During the evening the gathering was addressed by Miss Walker, who is footing it across the continent.

Teacher—Can anyone use the word "beetle" correctly in a sentence? Willie Willis—Pa says it does beetle how you dress the way you do on the salary you get.

Greece instead of seeking to facilitate the movements of the League of Nations peace car evidently wants the blamed thing to skid.

Good Interest and Absolute Security

A liberal rate of interest with absolute security is the attractive offer made by the Minister of Finance to holders of the Canadian Government war loan bonds maturing December 1, 1922. The offer is not made to investors generally, but only to the holders of the bonds soon to mature. The bonds to be retired, bearing interest at five and one-half per cent, will be exchanged for new bonds bearing the same rate of interest. See the advertisement of the Minister of Finance elsewhere in this issue.

On Friday, August 18th, Miss Annie, eldest daughter of John Eddy, of Beaver Mines, narrowly escaped death in a runaway accident. Miss Eddy is fifteen years of age and was driving the hay-rack team for her father. In some way she fell between the horses and in their fright and panic was miraculously saved from fatal injury. She was badly cut around the head and for a time it was feared the skull was fractured. She is now on the road to recovery.

"If the other members give back theirs, I will return \$150 of my indemnity, too." That was the statement of Alex. Moore, U.F.A. member of the legislature from Cochrane, when interviewed by a reporter.

Judge—What had the defendant been drinking when you arrested him? Cop—Whisky, I think, your honor. Judge—You think? You think? Aren't you a judge? Cop—No, your honor, only a patrolman.

IS IT A QUESTION OF—

Where To Go THAT KEEPS YOU FROM TAKING A HOLIDAY TRIP

Then let us help you to solve it by suggesting

"The National Way"

TO

PACIFIC COAST

EASTERN CANADA

CANADIAN NATIONAL offers a diverse route to the Pacific Coast, going rail and steamship, returning all rail, or vice versa, thus giving passengers the advantage of a delightful boat trip as well as travelling over entirely different territory in each direction. The Northern Canadian Rockies, traversed by the Canadian National, afford the finest mountain scenery to be found on this continent and so vast that it is always new. To make your trip complete a few days should be spent at Jasper Park Lodge.

THERE is nothing that will contribute so much to the enjoyment of your trip or holiday as travelling Canadian National to Port Arthur or Duluth, these steamers of the Northern Navigation. In connection with this summer trip east, there is the opportunity of returning by a cool all air route, the Canadian National route a comfort given route and comfort given train. East by boat, west by rail, or vice versa, or all rail in both directions.

SPECIAL SUMMER FARES NOW IN EFFECT THROUGH DAILY TRANSCONTINENTAL SERVICE

—FASTEST TIME—SHORTEST LINE—SUPERIOR ROADBED—EXCELLENT SERVICE—

THE "CONTINENTAL LIMITED" operates daily between Montreal and Toronto, Cochrane, Winnipeg and Pacific Coast points, and comprises through all-steel Comfort-Observation-Library Car, Standard and Tourist Sleeping and Dining Cars, Colonist, car and coaches.

THE "NATIONAL" operates daily between Winnipeg, Port Arthur and Toronto, carrying a modern and up-to-date equipment.

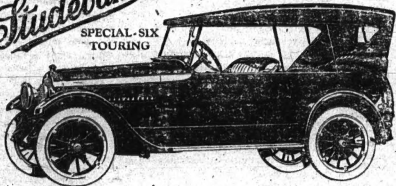

There is a wide choice of routing and stop-over privileges, enabling you to cover new ground in both directions.

Any agent will assist with your trip, Route Fares, make Reservations and look after all details.

"Built-in-Canada"

Studebaker
SPECIAL-SIX
TOURING

Was **2075** Now **1795**

SAVINGS resulting from capacity manufacture are now offered to the buyer of the Studebaker Special-Six. The new price of \$1795 is \$280 under its former price.

Studebaker reductions became effective August 7th after Studebaker had completed the biggest seven months in its 70 years' history. And at a time when Studebaker had 15,000 unfilled orders on hand! It is a Studebaker policy of long standing to share manufacturing savings with the customer.

The performance, durability, comfort and quality of the Special-

Six is recognized everywhere. And here's new proof of its endurance: Studebaker's sales of repair parts, covering accidents as well as service, for the first seven months of 1922 averaged but \$7.00 per car. That's less than they were for the first seven months of 1919, in spite of the fact that 186,000 new cars were sold and put into operation since January 1, 1920.

The Special-Six at \$1795 represents a new standard of value—the greatest value Studebaker has ever offered, and that means a value that is positively unapproached anywhere in the industry.

Cool lights cool ventilator; massive head lamp; tonneau light with long extension cord; rain proof, one-piece windshield; windshield wiper; right day door; three-proof transmission lock; tool compartment in left front door.

Don't Squeeze

The failure to organize a Wheat Board to assume full charge of the marketing of this season's grain crop in Western Canada leaves the situation this year much the same as a year ago when a slump in prices took place as soon as the grain began to be placed on the market. The fall in prices was so great as to completely wipe out, in thousands of instances, the farmers' profit and to bring the selling price actually below the cost of production. Notwithstanding, a fairly good yield in many parts of the West last year farmers sustained financial loss.

Now with the 1922 wheat crop about to be marketed, and with the best crop since the banner year of 1915 to be sold, it is of the utmost importance that this huge volume of wheat should not be forced on to the market at once, the inevitable result of which would be to cause a "break" in prices that would be disastrous and spell ruin to many people.

But, in the absence of a Wheat Board, it is possible to check and control the marketing of grain by tens of thousands of individual farmers? These farmers have contracted debts they must pay and are anxious to pay. The fall and early winter months, following the harvest, is the period for the liquidation of liabilities. Banks, mortgage companies, implement companies, merchants and individual creditors all expect and call on the farmer to "pay up" at this time and each and all usually proceed with measures to "collect." The wholesaler and jobber who has extended credit to merchants on the strength of the credit the merchant has given to farmers makes demand for his money, thus leaving the merchant no option but to press the farmer. And the wholesaler is forced to do this, because the manufacturer is selling upon him to reduce his notes. And back of the manufacturer is the Bank which advanced large loans to enable him to keep his factory busy and his men employed during the season when little ready money was coming in. The Banks, too, have made advances not only to the manufacturers, but all down the line to wholesalers, jobbers, merchants and farmers, and have financed numerous small other companies during a period when they could not collect even interest in many cases not to mention principal sums.

Everybody will recognize, of course, that the Banks cannot go on indefinitely advancing money on loan unless such loans are repaid and periodically there is a general liquidation of outstanding liabilities. Only so can Banks function properly, the interests of depositors be safeguarded, and the financial stability of the country be maintained.

While fully realizing these things there is a factor in the present situation that must be taken into account if irreparable loss is not to be inflicted, not on the farmer alone, but upon every national interest, the Banks and other large financial institutions not excepted.

This season's Western crop should be a debt reducing crop. Rightly handled it will accomplish that purpose in large measure. The fact must be appreciated, however, that one good crop will not offset the liabilities incurred during four or five years of poor crops or no crops at all. And if the pressure to secure collection of debts in all quarters is so great as to compel farmers to market their grain as rapidly as it is threshed, the market will be so glutted that prices will fall below a figure where any profit is left for the farmer. If the farmer derives no profit from his year's labor, and but barely succeeds in covering his costs of production, there will be nothing wherewith to reduce the present burden of debt.

If because of shortsightedness in attempts at debt collection wheat is forced on the market beyond the ability of the market to absorb and a bad break in prices results, the farmers' profits will disappear and with the disappearance of those profits his ability to pay his debts. Failure on the part of the farmer to pay will rest immediately on merchant, wholesaler, manufacturer and Bank, and ultimately on the nation as a whole.

It, therefore, is not in the interests of the farmer alone that every effort should be made, and every device provided, to render unnecessary the dumping of the crop on the market immediately following threshing. It is as much in the interest of the Eastern manufacturer and financier as it is in the interest of the Western farmer that wheat prices be maintained. It is likewise in the interest of the city artisan and laborer. Cheap wheat might result in a slight lowering in the cost of bread, but a few cents less for bread would not compensate for loss of employment due to a slowing up or shutting down of industrial plants and other works caused by financial stringency.

On the other hand, the gradual marketing of the crop, the maintenance of fair prices, and consequent profit to the farmer will enable the latter to pay a portion of his accumulated debts and thus ease the financial situation all along the line and operate to restore confidence and re-establish credit.

The Modern Slave

Human Labor Is Rapidly Giving Place to Machinery

To make 100 pair of women's shoes by hand takes 1,025 hours of labor. To make them by machine requires only 80 hours. A machine-driven saw makes as many pine boards in 372 hours as can be sawed out by hand in 16,000 hours. We are heard of for a day when the only human labor will be making machines and keeping them adjusted while running. The machine is the modern slave. In effect, each of us has many of these slaves working for us. That is why we have a higher standard of living than our ancestors.—Minneapolis News.

Two auto tires make an excellent sling for lifting barrels.

Ancient Masterpiece Sold

Carving of Head of Egyptian King Brings \$30,000

What is described as the "finest expression of Egyptian statuary art in the world" has been sold at Sotheby's auction rooms for \$30,000. It is the head of Amenemhat III, an Egyptian king who lived about B.C. 1800. It is cut in obsidian, which is said to be one of the hardest stones, on which an artist can work.

It measures four and seven-eighths inches from the top of the head to the chin, but Professor Percy E. Newberry, the Egyptologist, has pronounced it "a masterpiece that has not been surpassed by any sculptor of any country or age."

Give your local merchants a chance. Buy at home.

Dr. Chase's Ointment

What if Nature Struck

What a jolly good thing it is that Nature does not go on strike, but goes on working all the time. Nice men we should be if it was so. But what an example the dear kind old lady is—Kingston Standard.

OVERWORKED NERVES

The Most Successful Treatment Is Through the Blood

The early stages of nervous debility are noted by restlessness and irritability in which the victims seem to be oppressed by their nerves. As the trouble advances, common symptoms are a tired feeling; weakness in the knees and ankles; headaches, backaches and sleeplessness. The matter requires immediate attention, for nothing but suitable treatment will prevent a complete breakdown.

The nervous system governs the whole body, controlling heart, lungs, digestion and brain, so that it is not surprising that nervous disturbances cause acute distress. For troubles of this kind Dr. Williams' Pink Pills succeed when other treatment fails, for these pills make new blood, enriched with the elements on which the nerves thrive, and in this way reach the root of the trouble. In proof of this is the statement of Mrs. Dockrill, Stratford, Ont., who says:—"My daughter, Matilda, was suffering from nervous debility, and the usual remedies did not seem to help her. She was advised by a friend to give Dr. Williams' Pink Pills a trial, and soon we found they were doing her a great deal of good. She complained of pains in the stomach, and a severe twinging of the heart, with a general weakness. Under the use of these pills she continued to gain, and I am glad to say she has saved her going into a decline."

You can get these Pills from any medicine dealer or by mail for 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Minard's Liniment used by Physicians

Mt. Everest Named After Englishman

British Official Was Head of Survey Department in India

It is surprising to learn that the man whose name was given to the highest mountain in the world lived so recently that his son is still alive. One is apt to think of the names of places as they were of immemorial antiquity. Yet it was only in 1856 that this mountain received its name; it was called after a British official in India who afterwards became Sir George Everest. It was called in Tibetan, the language of the district in which it lies, Jomo-Kang-Kar, or Chomo-lung-ma, no one quite knew which.

Sir George Everest was head of the Indian survey, a department concerned with mapping the whole country. He was so deeply interested in his work that, when he was once on a holiday at the Cape, he examined the survey of that colony as it was then, and discovered mistakes which made it necessary to make a fresh survey.

Asiatic Yak at Wainwright

A number of Asiatic yaks have been added to the animal herds at the National Park at Wainwright, Alberta. It is expected they will be crossed with the buffalo and produce a useful hybrid, an experiment that will be watched with interest by zoologists.

Natural History

"I am told you went in for speculation on the Stock Exchange lately," said our tradesman to another. "Were you a bull or a bear?"

"Neither. I was an ass!" replied the other.

Letting Him Know

"Would you like to take a nice long walk?" she asked.

"Why, I'd love to," replied the young man caller joyously.

"Well, don't let me detain you," she said sweetly.

The Problem Of The Mentally Defective

Grave Social Menace That Is Not Properly Understood

The mentally defective constitutes by no fault of their own, one of the greatest and most perplexing of social problems. This fact is all too little understood and appreciated.

It is usually estimated that from 1 1/2 to 2 per cent. of the population are below par mentally. On that basis there are in Canada from 135,000 to 150,000 of these unfortunate ones. Some are idiots, utterly helpless and unable to care for themselves. Others are imbeciles, a grade higher than idiots, but unable to support themselves, and requiring constant oversight and protection. Between the imbecile and the normal are the much larger proportion who because they are not easily detected constitute the greater menace. After they reach adult years they remain mere children in mentality and self-control, yet possessed with all the passions, propensities and desires of adults.

It is easy to see what a menace this combination constitutes to themselves and to the community.

Their sexual propensities are unusually strong, and they have neither mental vision to foresee the consequences of indulgence, nor moral self-control to govern their passions. They multiply twice as fast as normal folk, and always reproduce their own kind and this quite regardless of whether they are married or not. In the Board of Education Offices in Vancouver is a family chart showing that some years ago an alcoholic man married a feeble-minded woman. Twelve children were born. Three, fortunately died young. The nine who grew up are all feeble-minded. One of these, a young woman now in her twenties, is the illegitimate mother of five children all feeble-minded. Fourteen mental defectives, each one a social problem, from one marriage that never should have been allowed.

It is estimated by those best qualified to judge that two-thirds of all prostitution is due to feeble-mindedness. Moreover, a large proportion of the children born out of marriage have feeble-minded mothers. These women living in promiscuous sexual indulgence soon develop venereal diseases and infect all their male associates. Many of these associates are normal young men who afterwards marry, and infect their innocent wives, and pass on the dread heritage of these terrible diseases to their children. It is estimated that not less than thirty per cent. of venereal disease is due to this cause.

At least fifty per cent. of all crimes in general are committed by these unfortunate. Their uncontrolled passions lead to assault, common or indecent, to incendiarism, to murder, to burglary, to banditry, to the demoralization of children of both sexes.

Many of the epidemics of vice in schools is due to a small group of feeble-minded girls or boys or both. Normal children, especially boys, are by them led into vice, and the evil rapidly spreads. Mischiefs far thus done that will curse these youths for years if not for life.

It is a false economy not to provide for the care, training or restraint of these defectives. A large part of the enormous cost of administration of justice, police courts, jails, prisons, reformatories, etc., could be saved if adequate provision were made for their segregation, specialized training and prevention of the reproduction of their kind. A subsequent article will however deal with the remedy for this great social evil.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, sores and various inflammatory pains its record is beyond reproach.

Giant World Bank Proposed

A plan for an international bank with a capital of \$2,400,000,000, which would revolutionize the methods of conducting international commercial transactions, was advanced by Senator Hitchcock, Nebraska, in a speech before the mid-summer convention of the National Retail Dry Goods Association at Grand Central Palace, New York. Under Senator Hitchcock's proposal, which startled his hearers, paper issued by the projected bank would be substituted for gold as the basis of international credit.

Gentle Hint

"Physical culture, father, is perfectly lovely!" exclaimed an enthusiastic young miss just home from college. Look! To develop the arms I grasp this rod in both hands and move it slowly from right to left."

"Well, well," replied dad admiringly, "what won't science discover next? Why, if that rod had straw on the other end you'd be sweeping."—American Legion Weekly.

W. M. U. 1485

How Does This Strike Your Fancy?

Favorably, I am sure. For who is the woman that would pass this costume by without an exclamation of approval? She would be mighty hard to find. It is like a gorgeous orange and white butterfly. Heavy crepe is material of which it is fashioned. It is a costume that is ideal for the broadwalk.

Grow Your Own Fuel

Prairie Tree Planting Is Declared to Be Profitable

Evidence that the farmers of the prairie provinces have a means of guarding to some extent against fuel shortage by growing fuel on their own farms is supplied in a report received from the Dominion Forestry Nursery at Indian Head, Sask. On a patch of soil measuring a little more than one acre, 18 cords of fair firewood have been grown in eight years from Russian poplar cuttings. The plantation averaged a little over two cords per acre per annum, which valued at 18 per cord would give a revenue of \$18 per acre for every year the trees were left growing.

Setting forth these facts the Canadian Forestry Association remarks that much western wheat land is not producing \$16 per acre annually, and that by liberal tree planting, prairie farmers can both transform their home conditions and increase farm profits.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Wireless Underground

Used as Means of Communication in British Coal Mine

Although wireless telegraphy has been used so largely on the surface and in the air, very little has hitherto been done to utilize it as a means of communication underground. The possibilities in this direction are illustrated in a very interesting fashion by experiments recently made in a British coal mine. An aerial was set up in an underground region a quarter of a mile distant in every direction from the open. With only a small apparatus signals were heard from a number of high-power transmitting stations, including the large station near Berlin.

Comfort

"Carry the news to my wife," gasped the injured man. "Tell her I am fatally hurt, but say something comforting to her."

"I will," said the policeman. "I'll tell her you had the right of way."

Detroit Free Press.

Something to Do

A colored pastor announced to his congregation the following subject: "Brethren and sisters, I've come to preach a powerful sermon dismally." I've come to define the ungodliness, I've come to explain the unreasonableness, and I've come to uncover the unscrutable.

Ask for Minard's and take no other

Pursued by Photographers

Camera Fiends Prove a Nuisance to Princess Mary

Princess Mary is pursued by photographers more relentlessly than any other person in the public eye except Lloyd George. Camera men, professional and amateur, have attended her every movement since her marriage to Viscount Lascelles. She is assailed by them even when she goes to church. At a recent garden-party the Princess was so beset by the picture takers that she had to make known a specific request that they desist.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes? It has made asthma affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

Alberta Population

Statistics show that the urban population in the province of Alberta has grown in twenty years from 18,553 to 222,904, an average increase of about 10,000 a year. During the same period the rural population has been increasing at an average rate of 15,500 a year.

Great Activity Results From Resuming Work In Western Coal Mines

Lethbridge, Alta.—All lines of business exhibited signs of improvement in view of the coal strike settlement and a reopening of all mines this week.

Resumption of mining means the return of a million dollar fortnightly payroll to this city and towns of the Crow Nest Pass, operators having a six months' run, full shift, in sight. It is believed here that all danger of a coal famine on the prairies has now been averted.

Miners to the number of about 100 employed on farms and in construction camps are hastening back to the mine camps to secure their old jobs, and Thos. Longworthy, Superintendent of the Government Labor Bureau, said that this was complicating an already acute labor shortage. Two hundred men are wanted here for the harvest, and in other fields, but none are available. Mr. Longworthy has sent out an urgent call for men, as orders are pouring in as harvest operations increase. A thousand men will be needed in Southern Alberta to harvest this year's big crop.

Calgary.—Coal miners in District 18, during the recent strike, is estimated to have lost approximately 13,500,000 in wages, while the members of the Western Canada Coal Operators' Association are faced with a loss of \$9,000,000. These figures are arrived at from evidence as to earnings given before the Knowles Conciliation Board. The strike has been in progress for practically five months, and was the longest longest strike in the district, that of 1911 lasting three months longer.

From interviews with various operators, it is predicted that the mines will now be working to their utmost capacity, and it is anticipated that nearly 3,000,000 tons of coal will be mined by the union colonies by December 31 next.

In addition to the association mines, there will be a very considerable output by the non-union companies, totalling probably about 400,000 tons a month.

Chinese Declare Peace

Leader of South China Faction Says War Is Ended

Peking.—The republican cabinet announced that President Yuan Kai-sheng is willing to resign in favor of Sun Yat Sen, deposed head of the South China Government, provided Parliament approves such action.

Sun Yat Sen, leader of the South China faction, announced that peace reigns again between the north and south and that "the war is ended."

National Loss Is Suffered By Ireland In Death Of Collins

London.—The death of Michael Collins, who has fallen in actual combat with the rebels as one of the first victims of the substitute plan of guerrilla warfare for organized resistance to Provisional Government, has impressed the British public far more than did even the death of Arthur Griffith, while the circumstances of his death, fighting against desperate odds in a carefully arranged ambush during the course of an inspection of his troops' position around Cork, adds to the halo surrounding his lamented death.

His daring and his personal attractiveness, combined with his adventurous career and his reputation as a courageous fighter, as well as a prudent administrator, helped to give him prominence and importance in the public eye, which was not shared to anything like the same extent by Griffith, who really was little known to the British people, and whose retiring nature did not lend itself to public demonstrations.

The British press is filled with tributes, personal sketches and of the hair-breadth escapes of the commander-in-chief, together with tributes to his loyalty in carrying out the conditions of the treaty he signed with Great Britain. Prominent men at home and abroad, from the Prime Minister down, hastened to pay tributes of condolence and respect.

When Arthur Griffith died, it was the subject of general comment that his life's work was virtually accomplished and his ideals achieved. With Michael Collins, his work was not so far off, and perhaps the question most ex-

Quebec Hands Over Fines

Ottawa.—The Federal Government's claim against the province of Quebec arising out of the matter of fines and penalties imposed for infractions under the Military Service Act in that province is to be settled on payment by the Quebec Government of \$20,000, in addition to the \$50,000 already turned over to the federal treasury. The claim arises from the payment to the Quebec Government of a large number of fines and penalties which ought to have been remitted to the Receiver-General for the Dominion.

Another Seed Grain Marketing System

Will be Undertaken by Alberta Department of Agriculture
Edmonton.—Making the third marketing system to be established by the administration, marketing of seed grain on an extensive scale and in accordance with a plan seeking to encourage the production of pure seed in Alberta is to be undertaken by the Provincial Department of Agriculture as a result of arrangements completed and which have received the approval of the Hon. George Howley, Minister of Agriculture. The announcement of the new scheme has been made by H. A. Craig, Deputy Minister. It follows the Government's operations in butter and egg marketing.

Riley's Standard Bearer Arrested

Charged With Theft Man Admits He Was Not Overseas
Toronto.—Charles Gannett, who carried the flag of the hikers when they went on their trek to Ottawa to demand relief for returned men, was arrested on a charge of theft. Sergt. David Hunter, of the 4th Highlanders Regiment, complainant in the case, charged Gannett with theft of a military uniform. Gannett is alleged to have admitted not having been overseas.

Vancouver Millers Lower Flour Prices

Vancouver.—Bringing their product in line with recent declines in the price of wheat, Vancouver millers have reduced the wholesale price of flour by thirty cents a barrel for car load lots.

To Assist Farmers Saskatchewan Premier Has Feasible Plan to Prevent Glutting Wheat Market

Regina, Sask.—A concrete suggestion outlining the method which might be adopted by the banks to assist the farmers to market their grain in such a manner as to prevent the glutting of the wheat market and a consequent depression in prices was telegraphed to Hon. W. L. MacKenzie King, by Premier Charles A. Dunning.

Folowing out that the banks stand "at the base of the pyramid of credit," Mr. Dunning suggested that "if they could devise means of extending portions of amounts due them from all creditors to enable more gradual liquidation," he feels sure that the effect would be felt through all classes of creditors "down to the farmers and probably prevent slaughter of wheat prices."

Mr. Dunning points out that merchants as well as farmers stand creditors to the banks in considerable sums of money, and his proposal involves a gradual liquidation of their bank indebtedness by all creditors, thus eliminating the necessity for merchants and other crowding the farmers for cash payments early in the fall.

Murder Plan In Egypt

One Englishman a Day Until National Leader Is Returned

Alexandria, Egypt.—The recent attack in this city on Lieutenant Colonel Arthur Frederick Hamilton Pigott was the sixteenth case in the series of murderous assaults upon British subjects in Egypt. It called again to mind the threat of the nationalists that an Englishman would be shot daily until the return of Zaidi Zaidi Pasha, the Nationalist leader, who was deported by the British last December, and is the latest addition to the extended chain of anti-British political outbreaks.

Lieutenant Colonel Pigott, of the Royal Army Pay Corps, was shot and gravely wounded in Kad el Fadl Street, and was taken immediately into the house of an Egyptian doctor, M. Abdel Meguid at No. 1 Kad el Fadl Street, and was given first aid, being afterward transported to the Officers' Hospital at Abbassieh where one of the three bullets which had hit him was extracted.

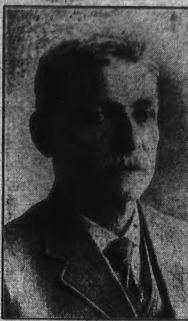

Hopes are entertained of his recovery, but this new crime has aroused great indignation among the European population in Egypt.

Soviets May Expel Scientists

Reval, Esthonia.—A dispatch received here from Moscow announces the arrest of 200 Russian scientists and writers during the last few days in Moscow, and of 30 in Petrograd. The dispatch says they are accused of being unfriendly to the Soviet Government and that they will be expelled from Russia for various periods.

WESTERN EDITORS

Fred Stevens, Editor and Proprietor of The Gazette, Balduf, Manitoba.

Says Western Coal Strike Over

Strike of Alberta Miners Has Been Virtually Settled

Calgary.—The Alberta coal strike was practically settled, when the executive of the miners and the operators came to terms on an agreement which provides:

(1) Reduction of 15 per cent. on the old scale, which will be superseded as soon as 75 per cent. of the operators in United States coal fields sign an agreement.

(2) The agreement shall be in effect until March 31 next.

The agreement must be submitted to a referendum of the men, but the officials say that is largely a matter of form, as it will be endorsed.

The miners expect to be back in the mines almost immediately. Both miners and operators admit that the agreement practically means that the men are going back without any reduction, because either 70 per cent. of the operators across the line have either signed up or will be signed up by the end of the week. The agreement signed accordingly means that the Cleveland agreement has been accepted.

George Ham Celebrated 75th Birthday

Montreal.—George H. Ham, the veteran raconteur, celebrated his seventy-fifth birthday Aug. 23rd. He was at his office at the Canadian Pacific Railway Window Station, as usual. His seventy-fourth birthday was marked by the publication of his book: "Reminiscences of a Recreant."

Mr. Ham is now preparing another book.

Report Finding Ontario Gold

Sudbury.—What is considered to be one of the most sensational finds of gold ever made in the Sudbury district is on exhibition here. It is a piece of rock about 16 inches in length and eight inches thick, and pure gold is easily visible. It was found a few days ago, about 40 miles north of this town.

Lost In Labrador

Vancouver, B.C.—Miss Marguerite Lindsay disappeared a few days ago from Grenfell Mission, Cartwright, Labrador, and her friends believe that she was drowned, according to a message received here by Mr. Herbert Drimmond, Miss Lindsay's aunt. Details are to follow by letter. Miss Lindsay's father resides in Montreal.

Washington Official Defines Status Of The British Debt To U. S.

No Change In Irish Policy

Dublin.—The Irish Free State Government will be continued on the lines marked out by Arthur Griffith and Michael Collins, whose views, freely exchanged with their cabinet colleagues, anticipated the necessities of the whole situation. No new lines of policy are contemplated. Schemes for developments await the definite establishment of the Free State, and all efforts of the Free State Government will be directed towards establishing the new state firmly in accordance with the terms of the treaty with Britain. The adherence of William Cosgrave and Richard Mulcahy will be as strict as that of the two dead leaders.

Railway Freight Shed Destroyed By Fire

Loss at Fort William Nearly Two Hundred Thousand Dollars

Fort William, Ont.—No. 3 freight shed of the Canadian Pacific Railway was practically destroyed by fire Aug. 20. The flames were kept from spreading into No. 2 shed which is separated by a fire wall from No. 3.

The fire also spread to several box cars in the yard.

No. 3 shed and contents are completely destroyed and between 25 and 30 empty box cars are also a total loss. The shed contained 7,000 bags of cement, 1,000 tons of nails, several hundred tons of binder (wies), some iron pipe and a quantity of miscellaneous freight. The bow of the steamer Kenora, which was tied to the dock, was badly scorched before she could be moved from the vicinity of the fire.

No information can be obtained as to where the fire started. Two Italians, who claim that they were the first to give the alarm, state that the shed was on fire when they first saw the flames, but others say that the first blaze originated in one of the box cars standing by the shed and spread to the buildings.

No records of the cost of the burned sheds are available in Fort William, but it is estimated that it could not be replaced for less than \$70,000, and the cars are damaged to the extent of at least another \$25,000. With the contents of the freight sheds the loss in the fire will probably total between \$150,000 and \$200,000.

Excursion Fares to East This Winter

Montreal.—The Canadian railways have decided to grant excursion fares from Alberta, Saskatchewan and Manitoba to all points in Eastern Canada during December and early January, to afford an opportunity to the people in the prairie provinces to visit Eastern Canada.

London-Paris Air Express Wrecked

Paris.—Five passengers in a London-Paris airplane narrowly escaped death when the machine crashed at Berek Plage, about 22 miles south of Boulogne. The mishap was due to engine trouble. Although the machine was smashed, the passengers escaped with minor injuries.

Western Wheat Will Be Shipped In Future Through Canadian Ports

Ottawa.—Following investigations of complaints made to the Department of Trade and Commerce here regarding the grades of grain received in England after shipment from Western Canada via United States ports and the taking up of similar questions with the British grain importers during the visit of Hon. J. A. Robb, Minister of Trade and Commerce, to Britain, it is expected that steps will be taken to try and secure the shipment of a greater percentage of Canadian wheat through Canadian ports than previously.

Occasionally complaints have been received by the department from British importers that grain received by them from Canada was not up to the standard of Canadian grades. Investigation of several complaints was made during the past year and it was found that the grain in question had been shipped to the old country through United States ports and that in the transshipment at

Washington. Funding of the \$1,135,000,000 debt owed by Great Britain to the United States was declared by Secretary of the Treasury Mellon to have no relation to the war loans made by the United States and Great Britain to other governments or to questions arising in connection with repayments of the former Central Powers.

Mr. Mellon made his declaration with respect to the British debt in a formal statement issued, he said, on account of numerous enquiries reaching the treasury as to the exact status of the obligations of the various European governments held by the United States with respect to the British debt. Reports have been published and statements made in some quarters, Mr. Mellon said, that the British liability was not incurred from the British Government, but for the other Allies, and that the United States, in making the original arrangements, had insisted in substance that though the other Allies were to use the money borrowed, it was only on British security that the United States was prepared to lend it.

"In answer to these enquiries," Mr. Mellon said, "it should be said that the obligations of foreign governments in question, had their origin almost entirely in purchases made in the United States, and the advances by the United States Government were for the purpose of covering payments for these purchases by the Allies."

Serious Economic Situation in Ireland

Disruption by Irregulars Has Completely Disturbed Business

Dublin.—Grave economic conditions have come rapidly in the wake of the policy of destruction of the irregulars in West Ireland. The collapse of some of the bigger business concerns has only been averted, it is declared, by steady support from banks, but the fact that the farmers and others have been unable to pay the interest on their advances for many months is bringing about a position in which the bankers may be compelled to take action.

Business prospects are extremely dark; prices of produce are falling rapidly, and the export trade, upon which the farmers depend, is suffering acutely from the dislocation of traffic caused by the destruction of railways and bridges. Perishable products, such as butter, are spoiling, as there are no facilities for cold storage. "Until normal conditions return the output of the creameries must be curtailed."

Failed to Swim English Channel

Dover, England.—T. W. Burrows, the Englishman who swam the English Channel in 1911, again essayed the feat, starting from the French shore to cross to England. He had to give up the attempt, however. Jean Michael, a Frenchman, also started the swim but failed.

By making your purchases from your home merchant you are contributing directly to the prosperity of the community in which you live.

In this old world more feelings are hurt by bad manners than by bad intentions.

Miss Henrietta Robbins left for Calgary on Saturday, where she enters the Normal school for a term.

One good thing about the automobile is that it makes so many new troubles that you forget all about the old ones.

The funeral of the late Fred Allott will take place at 4 p. m. Friday from the home of Mr. and Mrs. Thomas Barnes.

Miss J. and Mr. W. Galloway arrived from Calgary Sunday morning and on Monday assumed their duties as teachers at the public school.

Mr. Bishop, commissioner under the Liquor Act, will shortly visit Lethbridge to enquire into various matters there affecting the enforcement of the Act.

Mr. and Mrs. Frank A. Beebe left Monday on their return trip to Regina by motor. Mr. and Mrs. Beebe thoroughly enjoyed their trip to the mountains this year.

Messrs. Dr. R. K. Lillie, Carl Smith, W. J. Bartlett and Peter Montalbetti were guests of Count Valentino Rinaldi at his summer camp near King of The Peaks on Sunday last.

The marriage of Mr. H. Upham, barber, to Miss Gladys Gibson, took place at the home of the bride's mother, Mrs. James Milne, Eighth Avenue, last evening. The young couple will take up residence on State Street east.

The Lethbridge Conservatory of Music will announce in next week's Enterprise the opening of its branch here. The management expresses itself as being highly elated over the splendid support given by the people of Blairmore and will carry on here the same high standard of instruction as is afforded its students in Lethbridge.

Yellowstone Park is known to contain many natural wonders, but a Chicago tourist who recently returned from a trip through the park, discovered a new one. He relates: "When I crossed Alum Creek the alum split the hoofs of my horse into mere spindles. It was then a wide stream. When I came back three weeks later, the alum had shrunk the stream so I could jump across."

The Foremost branch of the Union Bank of Canada was entered by bandits at an early hour on Tuesday morning. The officials were held at the points of guns, while a clerk was forced to open the vault. The inner doors were blown out and cash and securities to the extent of about \$130,000 was extracted. The cash actually amounted to about \$11,000. The bandits made a clean getaway, and up to the present no trace of them has been found.

An evangelist, who was conducting nightly services, announced that on the following evening he would speak on the subject of "Lies." He advised his hearers to read in advance the 17th chapter of Mark. The next night he arose and said: "I am going to preach on 'Lies' tonight and would like to know how many read the chapter I suggested." A hundred hands were raised. "Now," he said, "you're the very persons I want to talk to—there isn't any 17th chapter of Mark!"

A bachelor is a man who chews tobacco when he wants to chew tobacco.

Lethbridge hockey fans are again talking of a closed rink for the coming season.

If your wife finds poker chips in your pocket, tell her they are a new kind of milk-bottle tops.

Mrs. T. Frayer returned to Calgary on Saturday, after a few days' visit with friends in town.

Mrs. Pinkney substituted at the school this week for Miss Davis, who arrives from the States about Monday next.

R. B. Bennett, K. C., will likely remain in Calgary and practice law in a new law firm which he will organize.

The duck season opens tomorrow. Owing to the fine weather, however, ducks are scarce and have not started to move yet.

Mrs. J. P. McNicoll and Miss Margaret Morency, who had been visiting their brother, Alex. Morency, left yesterday for Saskatoon.

Because the notice: "Chicken Dinner. Bring Your Chickens," appeared in a local restaurant window a couple of weeks ago, certain young ladies refuse to enter that restaurant any more.

Be fair to your local merchant, if he is not a mail-order-house patron. Ask to see his goods and compare prices before thinking of sending your money to the mail order house. You will find that it pays.

The Pass Clothing Co., open up for business tomorrow in the premises in the Alberta block formerly occupied by Thael & Risk. The Pass Clothing Co. will carry full lines of ladies', gentlemen's and children's clothing.

James H. Moore, well known horseman of Cowley, died at the Drewry ranch, on August the 11th, following but a short illness. Mr. Moore conducted a ranch in the Porcupines. He was a devout member of the I.O.O.F. and Rebekah lodges, and the funeral arrangements were looked after by Cowley I. O. O. F. lodge, the remains being laid to rest in Cowley cemetery on Sunday, the 13th.

The British Columbia government are asking for tenders for the purchasing of timber limits in Wigwam River district of the Kootenays and for the erection and completion of a mill for the manufacture of wood pulp or paper, with capacity of at least 125 cords of pulpwood per day. It is estimated that the land contains 207,000,000 board feet of spruce, balsam, lodgepole pine, cedar, fir and larch.

As matters stand at present with regard to the export houses, there seems to be a conflict of opinion as between the provisions of the Canada Temperance Act and the powers of the provincial legislatures. It has in effect created the question as to whether the Canada Temperance Act is ultra vires and has raised the point as to whether provincial legislation under the Liquor Act overrides Dominion legislation. The question is an interesting one as it concerns Lethbridge, it being a matter of common knowledge that under the privileges of the export houses liquor is being dumped into Lethbridge which later finds its way to the oilfields in the south and to other parts of Montana in the facility the city has as a distributing centre. The whole question will shortly be threshed out in the appellate court of the province, following the appeal in the Verberg case, in which the magistrate has been asked to state a case for the consideration of the court.—Ex.

Two divided by one equals divorce.

Next Monday will be Labor Day and a general holiday.

New Brunswick reports a fall of seven inches of rain in two days.

Born on Wednesday morning, August 30th, to Mr. and Mrs. Henry Zak, a son.
